Proper Feeding Basis Hog Increase

Save a pig for Britain. With every pig a potential source of bacon for Britain, and with the present good prices obtaining for hog carcasses, it behooves every breeder to raise just as many pigs as possible. One easy means of increasing hog production is to save every possible pig in every litter, states Edward B. Fraser, Division of Animal Husbandry, Central Experimental Farm, Ottawa.

There is more of a problem in raising winter litters because warm, comfortable quarters must be provided but the production of a large litter of thrifty pigs really starts with the proper feeding and management of the brood sow, both before breeding and during the pregnancy period. Good feeding before breeding is important for the conception of a large litter, while the feeding during pregnancy will influence to a considerable degree the size and strength of the pigs as well as the number at birth, and, in order that the sow may nourish her litter properly, good feeding after farrowing is essential.

Attention at farrowing time should not be overlooked even in summer production. With a clean farrowing pen, with suitable guard rails around the walls of the pen, and by being on hand at farrowing in case help is needed, many a pig will be saved. It seems worth repeating that every extra pig saved will help to swell Canada's production of bacon.

The period in a pig's life from two weeks of age up to five weeks has often been called the critical stage. Careful attention at this time will do much to save the pigs from stunting or actual loss. By proper feeding of the sow and by encouraging the young pigs to eat separately just as early as possible, the chances of runts or of the loss is greatly reduced. At this time the experienced pig feeder starts feeding the pigs in a creep, separate from the sow. This is very simply done by boarding off one corner of the pen or paddock to which only the young pigs have access. The best of feed is none too good. A mixture of sifted oats, cracked wheat and middlings with

sweet skim-milk in a separate trough or any pig starter suitable for weaned pigs may be used. With creep feeding, the weaker pigs get a better chance and results have shown that the pigs will be heavier and stronger at weaning than those not creep-fed. Further, under the creep-feeding system the pigs will gradually become so independent of the sow that when weaning does occur they will not suffer any serious setback.

Eggs—White or Brown

This morning on millions of breakfast tables eggs helped to get families off to a good start for the day, and in millions of other homes eggs will continue the good work at lunch and dinner. In varied dress — as golden scrambled, poached on toast, hard or soft in their shells, "sunny-side up" with ham, or hidden away in muffins or dessert — eggs are good for us at any meal.

A "MUST" FOOD
 Eggs are one of the "must" foods. Even when budgets are limited, at least three or four eggs a week are needed for each person. If possible, one egg a day for each child and each grown-up is recommended and sometimes two.

WHAT'S IN AN EGG?
 Eggs are rich in:
 Iron — one of the minerals our bodies need
 Vitamins A and G
 Good quality protein — important for children

They contain also some Vitamin D. STYLES IN SHELLS
 Some people like white shelled eggs while others prefer them brown. The color of the shell is related only to the kind of hen. Leghorns lay white eggs; most other hens lay brown eggs. The color of shell has nothing to do with age, condition or flavor of eggs. Flavor depends mostly on what the hens eat. Grade for grade, white eggs and brown eggs are the same.

YOLKS—LIGHT OR DARK?
 Many people think the color of the yolk indicate its "freshness" — the orange ones being older. This is not true for color depends on the hen's food and may vary from light yellow to deep orange and the egg still be of excellent quality.

COOLNESS PREFERRED
 Once a good egg, not always a good egg — unless properly cared for. Eggs, like milk, are perishable, and should be kept in a cool place—in your refrigerator, if possible.

THE ART OF COOKING EGGS
 High temperatures make egg white tough. To-day, the best cook doesn't boil eggs. Instead she puts the egg in cold water, brings it to a boil, covers, and turns off the heat. The egg should stand in the water for three minutes (soft cooked) and 20-25 minutes (hard cooked).

Scrambled eggs are best cooked in a double boiler, instead of directly over the heat. A moderate oven should be used for such dishes as custards, souffles, and cakes.
 On the vitamin chart, free on postal card request to the Health League of Canada, 111 Avenue Road, Toronto, you can further explore the importance of eggs in your diet.

Milk—Leader of Foods

Adults don't drink enough milk and children can scarcely have too much of it. It is the one food we simply cannot afford to do without, it is the foundation of an adequate diet, and is nature's aid to health defense. Dr. J. F. McCreary, in the current issue of Health Magazine states that one cannot secure an adequate quota of vitamin B2 without the habitual use of milk. Adults should form the habit of drinking milk, the energy food.

A Simple Rule
 Professor Henry C. Sherman, dean of food chemists, says: "At least as much should be spent for milk (including cream and cheese if used) as for meats, poultry and fish."
 Why Milk?
 Milk is one of the least expensive foods, if you consider its food values. Milk contains:

Proteins: of highest quality for growth
 Minerals: calcium, phosphorus, some iron
 Vitamins: A, B1 and B2
 Fat and sugar: for energy
 Milk has no equal among foods as a source of calcium.
 Milk is easily digested, too.
 A cup of milk, warm or cold, slowly sipped before going to bed, often helps one to relax and go to sleep more quickly.
 For Every Age
 Infants: Milk, with only orange

juice and cod liver oil added to the diet, sustains the baby entirely for the first weeks of life.

Young children: Need 3 to 4 glasses daily.

Big boys and girls: Require 4 glasses or more daily. They need plenty of calcium because they are growing fast.

Adults: Need at least 3 glasses each day either plain or in cooked dishes, or cheese.

And even older folks need calcium to keep the bones strong (2 glasses daily).

For Children

Physicians prefer milk which is not very rich in cream (or fat) for children. Children are better off with whole milk than cream in cereal.

It is better for children to learn to drink and like just plain milk, for then they enjoy it as it is commonly served.

Bottled, Dried, Evaporated

Milk is used mostly in these forms:
 Bottled: whole milk, skimmed milk, buttermilk
 Dried: dry whole milk, dry skimmed milk
 Evaporated: evaporated unsweetened milk

Comparative Value

About the same food values will 1 quart of fluid whole milk
 1 pint of undiluted evaporated milk
 5 ounces of Canadian cheese
 4½ ounces dried whole milk
 3½ ounces dried skimmed milk, plus 1½ ounces of butter.

Both Food and Drink

One advantage of milk is that it comes ready to serve. But good cooked dishes such as cereals cooked in milk, cream soups, puddings and hot breads often contain milk.

Free copies of ready reference vitamin chart, which explores the sources of vitamins, are available on request to the Health League of Canada, 111 Avenue Road, Toronto, Ontario. Another booklet which tells of pleasant ways to use milk in cooling summer drinks is also free for the asking. A postal card will bring you either or both.

Township of Vaughan Tax Sale Notice

Copies of the list of lands for sale for arrears of taxes may be had in the office of the Treasurer, J. M. McDonald, Maple, Ontario. The list of lands for sale for arrears of taxes in the Township of Vaughan was published in the Ontario Gazette on the first day of August 1942.

Notice is hereby given that unless the arrears of taxes and costs are sooner paid, the Treasurer will proceed to sell the land on the day and at the place mentioned in such list published in the Ontario Gazette. The date of the sale named in the said list is the fifth day of November 1942 at ten o'clock a.m. The sale will take place at the Township Office, Maple, Ontario.

VILLAGE OF RICHMOND HILL Treasurer's Sale of Lands in Arrears of Taxes

By virtue of a Warrant issued by the Reeve of the Village of Richmond Hill dated the 18th day of July 1942 and to me directed, commanding me to proceed with the collection of arrears of taxes, together with the fees and expenses, I hereby give notice that the list of lands liable to be sold has been prepared, and is being published in the "Ontario Gazette" under the dates of September 5th, October 3rd and November 7th, 1942, and that, unless the said arrears of taxes and costs are sooner paid, I shall, on the 18th day of December 1942 proceed to sell the said lands to discharge the said arrears of taxes and the charges thereon.

The sale will be held on the above date at the hour of ten o'clock in the forenoon in the Municipal Hall in the Village of Richmond Hill.

Copies of said List may be had at my office.

RUSSELL LYNETT,
 Village Treasurer.
 Dated at Richmond Hill
 August 3, 1942.

| Quantity of Mangolds, Potatoes and Vegetables | 1 DeLaval Separator, electric |
| Sale at 1 p.m. | 1 M.-H. Separator, electric, new |
| TERMS:—CASH. | 1 Woods Grinder, electric, reconditioned |

ATTRACTIVE FARM PROPERTY

The farm consists of 105 acres more or less of choice farm land. It is ideally situated on paved highway and has modern buildings and an abundant supply of water with a spring-fed beautifully tree-skirted pond. On the farm is a fine brick residence containing 12 rooms, equipped with furnace, built-in electric refrigerator, etc. There is a good bank barn, pig pen, and an implement shed. Abundant water supply at house and barns. This is a very desirable farm property, some of Markham Township's choicest soil, attractive pond, and good, well-equipped buildings, with hydro in house and barn. Terms for Farm will be made known on day of sale. Will be sold subject to a reserve bid. Farm property will be offered for sale at 2.30 p.m. sharp.

For Quick Results

We have probably all heard the story of the chap who was seeking employment and saw an excited crowd on the bank of a river. He rushed over and on learning that a man had disappeared in the depths he at once dived and brought him to the surface. But it was too late; the victim was dead. Making sure of this fact and ascertaining where the deceased worked he made his way there at once and applied for the job only to be informed that the position had already been filled. When he expressed his doubts as to the truth of this statement and announced that he was the chap who had just pulled the victim out of the drink, he was informed that the job had been grabbed off by a chap who saw him fall in.

Yes, that was quick work, but no quicker apparently than the results of Advertising in "The Liberal".

"I sold my things the same evening your paper was published," telephoned a satisfied user last week. And she added "I had so many answers I could have sold them over and over again."

Those who use our advertising columns testify as to their drawing power and praise their quick results.

If you have something to sell, put an "ad" in next week.
