Ontario Grain Crop Yield Is Exceedingly Good This Season

A Report of Crop Conditions Throughout Ontario From Ontario Department of Agriculture

The month of August was favourable for harvesting of grain crops in Old Ontario. Practically all spring grain was cut by September first, and most counties had from 30% to 70% of threshing completed at this date, with an average for the province as a whole of probably 60% completed. A few counties reported the work practically finished. In Essex 95% of spring grains were threshed by September 1st; in Lambton and Norfolk 90%; Kent, Lincoln, Dundas, Stormont and Glengarry 85%; and Carleton 75%.

In Northern Ontario grain cutting was practically completed at September 1st in Algoma, Nipissing, Sudbury and Timiskaming districts where very dry weather has prevailed, but in Cochrane, Thunder Bay, Kenora and Rainy River, very little of the spring grain was cut owing to heavy continued rains which have greatly delayed harvesting operations.

Average yields of grain crops in Ontario this season are exceedingly good. The fall wheat crop is estimated at 31.7% bushels per acre as against 26.6 bushels per acre last year; oats at 43.1 bushels per acre as against 33.0 bushels, and barley at 33.6 bushels per acre as against 28.7 bushels. Total production of these three grain crops for 1942 is now estimated at 121,041,000 bushels as compared with 90,325,000 bushels last year, an increase of 34%. The quality of this year's grain generally is good, but some sprouting was caused by weathering of stocks in the field in some localities. Although total grain production in Ontario is much greater than last year, a considerable amount of Western coarse grain will be required to be purchased owing to the high level of live stock numbers on hand in this province and also because some counties ordinarily do not produce sufficient grain for their winter needs. Pastures were maintained in good

condition in Western Ontario during the month of August, but dried up considerably in both Central and Eastern Ontario. Recent heavy rainfall will improve pastures in these latter areas and assure a continuation of the satisfactory condition of pastures and hay aftermath in Southwestern Ontario. Pastures are reported excellent at the Head of the Lakes, but poor from Nipissing to Algoma.

Total production of hay and clover, alfalfa, alsike and sweet clover, in Ontario this year will likely amount to about 7,250,000 tons, which represents an increase of 1,900,000 tons over 1941, and 1,007,000 tons over the annual average of the preceding ten-year period, 1931-1940. Alfalfa is approximately 500,000 tons greater than last year, and hay and clover almost 1,350,000 tons greater, but alsike is greatly reduced, while sweet clover production is approximately the same.

Corn for fodder is quite variable due to late seeding and a slow start. Weather during August was generally favourable for growth, and although many fields throughout the Province are considerably below normal to poor, quite a percentage of the acreage will give a fairly good yield. Prospects for buckwheat are also variable. Some fields promise excellent yields but in some sections this crop suffered considerable frost injury on August 24th and 25th. Soybeans are uneven in appearance and will require favourable weather during the whole of September for maturity as much of the crop was planted late. Many fields are very weedy. Turnips and mangolds are reported generally in fairly good condition, although in parts of Eastern Ontario and in Algoma, Nipissing, Sudbury, and Timiskaming districts dry weather during August retarded growth and development.

With Little Care Young Pigs Saved

Each year many newly-born pigs are injured and lost. This is not surprising as a little pig weighs only two or three pounds compared to 200 to 400 pounds for the sow. Most sows farrow eight or more pigs and this is quite a family to keep track of, consequently, many pig raisers take means to safeguard the young family.

The first step is to check the farrowing pen and remove projections, nails, loose boards and anything else which may cause injury to the young pigs. Cracks or openings in which a small pig can get its foot or head caught should be filled or covered, as it may have to get away from that spot in a hurry if the sow comes his way. Guard rails should be checked and repaired. Many a little pig is crushed against the wall when the sow lies down.

The sow should be placed in a farrowing pen a few days before she farrows, so that she will have a chance to become accustomed to the sights and smells of her new surroundings. One of the strongest instincts in animals is protection of the young and sows with new-born pigs will usually rush towards any danger real or fancied which threatens, with the result that a little pig may get stepped on. This is much less likely if sows are familiar with their pens.

Make much of the sow is good advice. It should be combined with quiet, gentle handling especially before farrowing.

Much of the feverishness and irritability of sows at farrowing may be traced to constipation. It is much easier to prevent than to cure. Adjusting the feed by adding to its bulk and reducing the quantity are usually effective. Bedding with chaff or short straw and not too much of it is a detail of management which may save a pig. Watchful attendance at birth with assistance only if necessary is a practice followed by many stockmen. Careful preparation of sow and pen for farrowing can do much to prevent what is too often termed bad luck and to save more of the pigs farrowed to grow into bacon for Britain and pork for Canada.

Township of Vaughan Tax Sale Notice

Copies of the list of lands for sale for arrears of taxes may be had in the office of the Treasurer, J. M. McDonald, Maple, Ontario. The list of lands for sale for arrears of taxes in the Township of Vaughan was published in the Ontario Gazette on the first day of August 1942.

Notice is hereby given that unless the arrears of taxes and costs are sooner paid, the Treasurer will proceed to sell the land on the day and at the place mentioned in such list published in the Ontario Gazette. The date of the sale named in the said list is the fifth day of November 1942 at ten o'clock a.m. The sale will take place at the Township Office, Maple, Ontario.

VILLAGE OF RICHMOND HILL Treasurer's Sale of Lands in Arrears of Taxes

By virtue of a Warrant issued by the Reeve of the Village of Richmond Hill dated the 18th day of July 1942 and to me directed, commanding me to proceed with the collection of arrears of taxes, together with the fees and expenses, I hereby give notice that the list of lands liable to be sold has been prepared, and is being published in the "Ontario Gazette" under the dates of September 5th, October 3rd and November 7th, 1942, and that, unless the said arrears of taxes and costs are sooner paid, I shall, on the 18th day of October 1942 proceed to sell the said lands to discharge the said arrears of taxes and the charges thereon.

The sale will be held on the above date at the hour of ten o'clock in the forenoon in the Municipal Hall in the Village of Richmond Hill.

Copies of said List may be had at my office.

RUSSELL LYNETT,
 Village Treasurer.
 Dated at Richmond Hill
 August 3, 1942.

No Reserve, Mr. Galbraith is giving up farming due to ill health

Terms:—Chattels Cash. Sale starts at 1 p.m.

Description of Farm

The farm consists of 97 acres of good farm land, including 4 acres of reforested and 2 acres of natural bush. There is an ample supply of good water from never-failing springs. There is a large L-shaped barn with good stabling and a new milking machine which goes with the buildings, a hay barn 90 by 34 feet, hen house and pig pens. On the farm is a seven room stucco house with asphalt roof, equipped with furnace. This is a desirable farm located in a good residential district. Terms of farm will be made known on day of sale. Will be sold subject to a reserve bid.
