C. J. BRODIE,
Stouffville.

MOVIES FOR WOMEN IN FARMING AREAS

One of the chief aims of the National Film Board's Rural Circuits is to help solve the problems of Canadian farm women. As part of this program a new film, **Kitchen Come True** is being shown in the rural areas of Canada to demonstrate how the old-fashioned farm kitchen may be transformed into an attractive and convenient centre for housework. **Kitchen Come True** shows that on many farms where the barns and agricultural machinery are up-to-date and efficient the housewife is still carrying on her domestic work with the methods and equipment of her grandmother. In this film the drawbacks of a typical old-style kitchen are pointed out, and ways of eliminating them are described in detail. Suggestions are given for the arrangement of furniture to save steps, for the provision of adequate cupboard space and for getting rid of the common sources of dirt and catch-all for rubbish.

Several of the improvements shown in this film depend on the availability of hydro power. Films on rural electrification such as **Valley of the Tennessee**, which the National Film Board has also shown on all its Rural Circuits are consequently being distributed to encourage this first step towards better living conditions on the farm. The ideas demonstrated in most of the films shown on the Rural Circuits, however, may be more easily adopted than these large scale plans. Canning methods, meal planning and the preparation of school lunches are among the subjects covered. District Home Economists frequently speak at showings of films connected with their special interests.

Besides bringing information and new ideas to the individual housewife, the Rural Circuits are making a contribution to the social life of women in farming districts. Women's Institutes in many communities are sponsoring the film showings, which have become a monthly feature of their programs. Special showings are also arranged on request for Home and School Associations and other organizations in which women play an important part.

DDT FORMULATIONS

In processed publication No. 37 the Division of Entomology makes tentative recommendations for the agricultural uses of DDT. They were discussed at a recent meeting of manufacturers in Toronto. In harmony with them and in pursuance of the policy of simplicity and economy in the number of formulations of DDT offered to the public, the Pesticides Administration recommend the following basis for consideration of registrations under the Pest Control Products Act:—

- "Agricultural Insecticides" means insecticides for use on crops of any kind but not on live stock.
- A DDT spray powder should contain a dispersal agent.
- The amounts of DDT permissible as the sole insecticidal agent in an agricultural insecticide should be the following only: 3 per cent, 25 per cent, 50 per cent and the amount present should form part of the brand name.

Classified Advertising

THIS IS THE DAY OF ADVERTISING—MAKE THE MOST OF IT. RATES—Five lines or less, 35 cents for first insertion and 25 cents for each subsequent insertion. Over 5 lines 5 cents per line extra each insertion. IF CHARGED NINE CENTS PER LINE.

There are many legends about the discovery of tea and coffee. One Great Ruler of the East became weary, tired and faint after a long walk and sat down to rest. To his surprise right close to him in a small bush a gorgeous looking bird started warbling a wonderful song. This Great Ruler of the East was so fascinated with this bird that he tried to catch it and in doing so he noticed some berries on this bush which he brewed. The brew had a lovely aroma and the taste was marvellous, appetizing and stimulating. Many materials have become quite scarce recently due to many causes and research work has advanced considerably. Sugar has been a world wide scarcity, noticeable to all. Having done a lot of research work in a humble way, Mrs. Baker said, "George, get busy and work out something to take the place of sugar." George scratched his head and started in to try. He knows that when his wife tells him to do something he may as well get busy, because a woman does not rely on alibis. Well our first concoctions were not too hot, but we kept improving until we eliminated a great portion of the bitter principles. Then to get the sugary taste was tough but we kept on until we succeeded. Then the filtering process was an expensive problem which took a lot of time. However, today we can process around 300 gallons a day and by summer hope to be able to process around 1000 gallons Bakers Sweetner at a time. The demand for Bakers Sweetner has grown immensely, so much so that we have shipped Bakers Sweetner to many parts of the Dominion and some has crossed the border. Practically speaking Bakers Sweetner can be used for sweetening for any purpose that sugar can be used. Bakers Sweetner requires no coupons; Bakers Sweetner is easy to use; Bakers Sweetner is not injurious; Bakers Sweetner is cheaper than sugar, \$5 worth Bakers Sweetner is as sweet as \$14 worth sugar. One party tells us that a quart of Bakers Sweetner takes the place of 8 pounds of sugar. Guaranteed as represented or money back. 25 oz. 25c, 40 oz. 35c, 1/2 gal. 65c, 1 gal. \$1.25, 5 gal. \$5, 10 gal. \$9.50 (containers extra), 25 oz. 1c, 40 oz. 10c, 1/2 gal. 15c, gal. jugs or cans 25c, each extra. No shipment less than \$1.50. We pay express up to 100 miles if money order accompanies order for 6 or more gallons. No cheques. Geo. E. Baker, Phm.B., manufacturing chemist, Stouffville, Ont.
