DEPARTMENT OF HEALTH TWP. OF NORTH YORK A Township Public Health Centre in Ontario

The above is the title of a 2-page article appearing in the January 1946 issue of the Canadian Journal of Public Health. It refers to our P. H. Centre here at Willowdale and the article is interesting and informative. Readers who are interested in a fuller report of the activities of the N.Y. Health Department have been invited to write for a copy of the 1944 Report and already requests have come in; the most distant request to date being from Regina. It is very gratifying to the Board of Health and Municipal Council to learn that the Public Health Centre is fulfilling a very worthy place in the life of this municipality and in the protection of the public health of its citizens.

ELIMINATE the feed hazard in chick raising

It isn't enough to know the analysis of a feed—you must know how that analysis is made up. You must know how many pounds of the expensive ingredients like powdered milk, meat meal and cereal grass are in the feed.

And you get this information, right down to the pound, of every ingredient in CAFETERIA Chick Starter.

We can't invite you to compare the ingredients of CAFETERIA Chick Starter with other chick starters for no other feed gives you full formula information.

We invite you to visit your nearest MONARCH and CAFETERIA feed dealer to check over the complete list of ingredients in CAFETERIA CHICK STARTER.
