He is survived by his wife, two daughters and three sons.

T.B. Chest Survey

Canvassers appointed from Women's Institute branches report favorable response to appointments for the chest x-ray survey to be made throughout King Township during August. This band of volunteers have undertaken their task in the spirit of the letter and at no small inconvenience to their time. It actually means that whatever organizations are interested in the canvass, 5,000 persons will have been called upon, including family calls. The importance of the x-ray test cannot be over estimated, points out Reeve L. B. Goodfellow, and being free and without inconvenience to anyone, should be used by adults and school age children. Health is a possession to be zealously guarded, and the knowledge gained in the preservation of this priceless possession is within the reach of all.

There is no better time than the present, and under such excellent conditions, to find out the exact state of our lungs.

SAFETY IN SOAP

Soap is effective against most disease germs. So, says the health department at Ottawa, even though others have handled it, there is no reason to shun the soap in a public washroom. However, the health authorities advise against using common towels, in washrooms or elsewhere, since they can transmit disease.
