Sunday's high velocity wind and cloudburst wrought damage to trees and corn crop throughout many districts. Hydro and telephone service was disrupted over a wide area, and service men were called out to repair wires at numerous points as calls kept up especially because of hydro lines out of order. Falling trees and branches everywhere were said to be the cause and several points were without the service for one to two hours. CFRB station was unable to operate and telephone connection was severed from falling trees on wires, at the tower near Aurora. Much concern was felt at King and Temperanceville where special church services were being conducted in the evening.

The morning congregation filled the building, with fewer in attendance in the evening due to inclement weather and disruption of hydro earlier. Much effort had been given by Messrs. Hately and Pesant and other members in selection and arrangements of decorations. Rev. E. W. G. Worthington presided and the service and Rev. Edward Morley of Toronto, the evening. The choir rendered the famous Hymn of Praise at both services and Mrs. T. Proctor sang The Lord's Prayer. "Well, there's nothing wrong about that. Is she a blonde or a brunette?"

"He's bald,"—Kablegram.

Some widows are grass—but none are green. "Your methods of cultivation are hopelessly out of date," said the crop adviser to the old farmer. "Why I'd be astonished if you got even 10 pounds of apples from that tree."

Choosing Your Laying Mash

Anytime now you will be housing your pullets — many are already in and laying well. Up until now you have spent a great deal of time and money on them without any return. You now have to choose a laying mash to get profitable egg production. This is a very important decision to make and with all the different brands of laying mashes on the market it is a problem.

We recommend the Master Feeding Program with Red Head Egg Mash.

Drop in at our store and let us discuss your feeding program with you.
