Radials Likely To Run Until Rapid Transit Plan Complete

COMMISSION AUTHORIZES \$7,500 EXPENDITURE FOR REPAIRS AND MAINTENANCE — LINE SHOWS INCREASED PROFIT FOR JULY

Reeve P. C. Hill reported to the municipal council this week that the T. T. C. had approved the request of the North Yonge municipalities to continue operation of the line another year. He reported further that to maintain the line in operation an expenditure of \$7,500 would be required. This amount is made up of \$1400 for replacing 700 ties, \$1000 for maintenance of trolley wires and fittings, \$1000 for restubbing po's north of Steele's Ave. and \$4100 for maintenance work on cars.

Reeve Hill intimated that this expenditure of \$7,500 would put the line in shape for operation for a period of from three to six years. The opinion was expressed that the present plans are to continue operation of the radial line until the completion of Toronto's rapid transit plan.

Reeve Hill reported that the Commission had decided against replacement of switch at Stop 8, due to the cost which was estimated at \$5000.

The T. T. C. report on the operation of the Radials for the month of July showed a profit of \$2,016.03. compared with an operating profit of \$1,253.29 for July 1947. Passenger revenue for July 1948 was \$19,595.51. This compares with \$17,976.39 for July 1947, an increase of \$1,619.12 or more than 9 per cent. Passenger revenue for the first seven months of 1948 shows an increase of \$5942.85 or 4.85 per cent when compared with the same period last year. Operating expenses were about \$800 more than of July last year due to increased mileage operated and to increased costs.
