CANADIAN SPORTS PARADE

URING a recent reception at Toronto's new Radio Station CKFH, the thought occurred to us that if the floor supporting the crowd of 500 or more were to suddenly collapse, the cream of the sporting world would vanish irreplaceably. Newspapermen, sportcasters, promoters, hockey and football players were crowded into one jovial mass-honoring Foster Hewitt. 'Mr. Hockey' shook hands and talked with Major Conn Smythe, Joe Primeau, Ted Reeve, Happy Day, Joe Perlove, Bob Hesketh, Dave Price, Jim Coleman, Frank Tunney, Deacon Allen, Bob McGall, Dr. Harry Griffiths and others too numerous to mention. For several, hours the talk rolled up and down the studios and (by actual count) the word 'sport' was mentioned 3-million, 223-thousand times. Our best wishes to CKFH (Dial 1400) and to all its merry crew. For Foster and Bill Hewitt a dream has come true, while 'W.A.' looks on approvingly.

Hockey Fan-1951

nedy's face.

They say the crowd was small like the rink. Nowmost rabid NHL adays, only the few by the rail hear hockey fans are usualy perched high the heartbeats, but the great, loyal majority (13,000 strong) can in the greys and greens. From their make up in opinions and cat-calls what they miss from the greys and lofty position these the greens. Undoubtedly television hardy souls com-...... mand a sweeping hockey by giving us all a close-up view of their fellow

spectators but the players performing below seem to rotate on the ice like leisurely puppets at play. A body-check delivered by a

Harry Watson or a Leo Reise, while it seems dynamic and vicious from a seat near the rail, looks like a gentle protest to our friends in heaven. "Aw, step into him, Harry! Don't be afraid of the bum!", echoes through the hall. The Maple Leafs roar to the attack and Ted Kennedy breaks through, going like the wind. "Aw, turn on the steam, Teeder! You're practically standing still!", scream these rabid fans, failing to catch the of the Toronto Anglers' and Hunttremendous strain creasing Ken- ers' Association in the interests of

In the older days, before Maple Leaf Gardens and the other arenas, year's Sportsman's Show will be a hockey was played right under the stage and water revue, a conservanose of the spectators. Each intent tion show, dog show, boat show, to murder was clearly seen by the motor show, travel show and an crowd-before the killing took Indian village. In the sports demonplace. The fans were already en- stration area, sports such as golf, joying the body-check before it tennis, judo, badminton, archery, actually came. This personal touch boxing, fencing and so forth will be doubled the excitement of the play. demonstrated by experts and

AMSTERDAM, NETHERLANDS ing the Palace of Peace where - If I may be allowed to make the Permanent Court of Interone pun in this series of letters I'd like to say that we are now "in Dutch proper." We left Copenhagen, Denmark, by plane and landed in this famous Dutch city thirty minutes ahead of schedule because of a powerful tail wind.

The day was cloudless and we had a wonderful view of the earth below. Two things struck us as most unusual. These were the green fields at this time of year, (there being no snow or frost) and the network of waterways. Denmark is made up of about 500 islands while most of Holland, of course, is reclaimed from the sea. The waterways of Denmark are irregular and from the air they look like rain-fed streams, while those of Holland seem orderly, more like a system of well-laid-out streets. The districts, communities and even the farms in Holland are divided or bounded by these waterways, or canals, and most of the transportation is by water.

But I'm getting ahead of myself. I had better fill you in on our last day in Denmark. We were taken about 20 mile north of Copenhagen to see Frederiksborg castle which was built nearly 400 years ago and took 60 years to complete. It is a massive structure with towers and steeples. Formerly it was he residence of the kings of Denmark but now is a public museum. It contains so many treasures connected with the history of Denmark that we felt it would take a week to see them all.

We had lunch at a restaurant overlooking the castle grounds and then returned to Copenhagen. In the evening we were guests at a dinner in one of the city's famous restaurants - The Viking. Among the guests were Mr. Cornett of the Canadian Legation in Denmark whom I mentioned in my last letter, and Harry Horne of the Canadian Legation in Norway, who comes from western Canada. The dinner was perfect in every way, as are most things in this country and it was with reluctance that we left to board the plane for Am-

many historical buildings includ- rifle shooting. national Justice presides. This is a handsome building set in the middle of beautifully landscaped grounds.

The next day we were up early and started out from the hotel at 8.30. We went first to visit the co-operative flower auction at Aalsmeer, which I would think, is the largest of its kind in the world. The cut flowers sold there are shipped not only to the continent and the United Kingdom but to the United States and Canada. They are shipped by air and the flowers sold here one morning are in the U.S. and Canada the next day. I might mention that the flowers are brought to the auction by boat for canals run alongside every hothouse and garden.

We then went north and had lunch at Hoorn. While there we watched Freisian cattle being loaded for shipment to France. The exporting of cattle, which was knocked out by the war, is now pretty well back in full swing and is important business. Later we visited a farm of 80 accres where 80 head of Holsteins are maintained. While some feed for these cattle is bought outside most of the forage and silage and hay is grown on the 1arm, we were told.

After inspecting the farm we drove north to Leeuwarden to spend the night. In doing so we crossed over an 18-mile dyke which divides Yssel Lake from th North Sea. It is a remarkable piece of engineering.

the brother of a man who with his family migrated to our farm three years ago. There was much to tell him about how his broer has fared in the land of his adoption and much to hear for retelling when I return. But there was an element of sadness in being the mediator between brothers, who as he said, may not see each other again.

Perhaps you wonder how we manage to talk with the people in these foreign countries? We have found that if you take your time you can be understood by them and by the same token you When we landed at Amster- can understand them. Nearly all dam's airport we were again of the people we met in Denwelcomed by a group of Esso mark and Holland have some representatives and government knowledge of English, but it officials.
