ELECTRICAL TIPS FOR THE HOME

If You Have to Grope Around in the Dark to Find a Light . . .

DON'T think you have to stumble along with old-fashioned, inconvenient lighting arrangements.

DO install switches at each entrance to a room. Then, lights can be flicked on or off near any door.

District Scout and Cub News

The Akela Club picnic last weekend was much enjoyed by all who attended. A total of thirty-four turned up and after lunch the adult section of the party visited the caves which are situated in rugged bushland in the Hockley Valley, complete with swamp, fallen trees, holes which look as though they housed snakes, chipmunks, rabbits, foxes, porcupines and probably skunks, though fortunately no one had to come up with a practical answer to what you do when you meet a skunk?

Cold air streaming out of the depths turned into steam at the mouths of several caves giving evidence of the depths to which they must penetrate the rocks, and caves which were large enough for the

AN ANCIENT EVIL
Dental decay is one of the oldest of human ills. The Stone Age man suffered from aching teeth just as the members of our 20th century civilization. Much suffering from dental decay can be prevented by proper diet and by regular visits to the dentist. Care of the teeth should begin in early childhood.

SEEING IS BELIEVING
Seeing is believing. We depend on our sight to supply us with more information than any of our other senses. The pace of modern living is often a heavy strain on the eyes and they sometimes need special care to keep them functioning properly. Headaches, smarting of the eyes or other troubles may indicate eyestrain. If in doubt, see a qualified eye specialist at once.

NOONTIME NIBBLERS
Are you a noontime nibbler? Do you "get by" at lunchtime on a sandwich and a cup of coffee? Workers in heavy industry especially need three square meals a day to keep you fit . . . and that means you should put something solid under the belt at noon. It's easy to prepare a lunchbox that is compact and yet nutritious. All it needs is a little "know how." See if you can't inject some life into your lunchbox.

The Department of Highways in its "Watch out for Children" campaign, urges all drivers to "think for the children, who do not always think for themselves." Drive watchfully and at a speed that will allow you to stop in time to spare a child's life, is the advice of highway officials.

The Problem Of The RETAIL MERCHANT

THE ONE PROBLEM common to all businessmen is — how to keep sales volume at a satisfactory level. This can be overcome to a great extent by carefully planned advertising. As a control medium advertising can be of considerable value in keeping sales at an economic level. Retail merchants however, especially those in small communities are confronted with the need of a very flexible advertising medium. One that can be used regularly throughout the entire year, yet pliable enough to suit the needs of the moment. Also, it must be one that can be tailored to fit any budget and at the same time give maximum coverage. Due to fluctuating prices it must be advertising that can be planned to reach the buying public within two or three days. Newspaper Advertising is the advertising vehicle that has proved beyond doubt to be of greatest value to retail merchants. It fills all their requirements and has been the most important, single factor, in the success of so many.

The Liberal is at your service. We publish a well printed weekly paper that will give your advertising very good coverage in this area. A phone call to Richmond Hill 9 will bring a representative to your door.
