We are happy to inform all citizens of the township that the mobile X-ray chest unit is now operating in the municipality and no doubt you have heard re the time and the location of the clinic nearest to your home.

Recently the Provincial Department of Education has ruled that all Teachers and all other adult employees of all school jurisdictions must have a Chest X-ray. This is being done now in our Township. This is done for the protection of the pupils and it is only fair that all parents and older children are also X-rayed and help to find and eradicate active tuberculosis which can become a scourge to mankind.

salesmanship is swell BUT . . .

Your merchandise may be the best — your prices may be right in line — and your clerks may be super-salesmen BUT unless you can get prospective buyers into your store, you cannot make sales.

The method of enticing buyers into your store that has proved most successful for retail merchants in small communities is, NEWSPAPER ADVERTISING. It is the one medium that can be tailored to fit any budget and still give maximum coverage in the area you should be selling to.

NEWSPAPER ADVERTISING will draw customers into your store, the rest is up to you. However, even newspaper advertising is not a magic wand, one treatment isn't a cure — plan to have a message reach your "should-be" customers every week through the year.
