

The International Refugee Organization, one of the United Nations' Specialized Agencies, will end its operations on 31 January, after a 55-month resettlement program whose annual cost exceeded that of the United Nations and all its other agencies. Above some of the refugees from IRO camps in Germany, Austria and Italy are shown boarding an IRO-chartered ship at Bremerhaven for the USA.

CHAMPIONS ARE DIET CONSCIOUS

Dodds could probably be voted the reach championship form.

The reason was a simple lack of speed. But what wasn't realized until he had won a few championships was that he had so much determination that he surmounted his early difficulties. He, himself, attributes much of his success to a combination of determination to win and the proper diet.

One of his favorite energy foods is honey. He has made honey must in his pre-race diet.

Every Canadian athlete can take a leaf from Dodds' record book and concentrate on developing the proper diet which will increase your source of action energy. Honey can and will do as much for you as it did for Dodds.

The accepted reason for the supremacy of Japanese middle and long distance swimmers lies in their diet. They eat immense quantities of foods rich in energy and alkalinity and B complex. These foods include oranges and the mochi bean.

The mochi bean is difficult to obtain in Canada but you can supplement it by eating foods rich in B complex like Ovaltine, wheat germ, as found in Hovis bread, Brewer's yeast. For alkalinity, anletics, eat figs.
