## The Problem Of The RETAIL MERCHANT

THE ONE PROBLEM common to all businessmen is — how to keep sales volume at a satisfactory level. This can be overcome to a great extent by carefully planned advertising. As a control medium advertising can be of considerable value in keeping sales at an economic level. Retail merchants however, especially those in small communities are confronted with the need of a very flexible advertising medium, one that can be used regularly throughout the entire year, yet pliable enough to suit the needs of the moment. Also, it must be one that can be tailored to fit any budget and at the same time give maximum coverage. Due to fluctuating prices it must be advertising that can be planned to reach the buying public within two or three days.

Newspaper Advertising is the advertising vehicle that has proved beyond doubt to be of greatest value to retail merchants. It fills all their requirements and has been the most important, single factor, in the success of so many.

The Liberal is at your service. We publish a well printed weekly paper that will give your advertising very good coverage in this area. A phone call to TURNER 4-1261 will bring a representative to your door.
