935 Attend Richmond Hill Chest X-ray

The National Sanitarium Association has announced that of the 935 people who received TB chest x-rays at the Richmond Hill Clinic earlier this year, only one active case of tuberculosis was discovered. This impressive record indicates the success achieved by this Association which is trying to stamp out TB. This service is made available to communities across Canada through the sale of TB Christmas Seals and is one which deserves the support of every Canadian. If each person avails himself of the free chest x-ray, a large percentage of tuberculosis can be cured in the formative stages.
