## "Careful, Pauline!"

Of course no one would dream of climbing a telephone pole without being especially careful. Yet every time you climb a shaky ladder or stand on a rickety chair you may not realize what a big chance you're taking. Actually more people have accidents right at home than anywhere else.

By avoiding accidents you save more than suffering and worry - you save money, too! In a family the size of ours (we're now over 31,000), these savings are important. That's why our employees are not only thoroughly trained to use safety tools and methods, but continually reminded to take every precaution to avoid injury to themselves and others.

It's another way we help keep costs down so we can provide you with the best possible telephone service at the lowest possible cost.

How to prevent home accidents is shown in "Home Safe Home", a folder available free from the Health Department of your Provincial Government or from the De-

partment of National Health and Welfare, Ottawa.
