"New" Industry for Indonesia

Ceramics production is a key industry in Indonesia, but until recently this country had to import quality ceramics for dinnerware. These imports have dropped, however, now that Indonesians have learned to produce similar quality wares, but lower in price than the foreign product. This was made possible by introducing new production methods with the cooperation of United Nations technical assistance. Photo shows ceramics worker in the village of Perled.

How big is a Profit?

A lot less than most people think!

The only quarrel most people have with profits is ... they think they are too big ...

But how big is too big? To find out, survey people rapped on doors right across Canada.

Most Canadians think companies like Imperial make 29¢ on each dollar of sales.

Most of them think such companies are entitled to make about half that ... 15 1/2¢ on the sales dollar.

Imperial's profit in 1953 was actually less than 8¢... less than a third of what most people thought we made.
