"Careful, Pauline!"

Of course no one would dream of climbing a telephone pole without being especially careful. Yet every time you climb a shaky ladder or stand on a rickety chair you may not realize what a big chance you're taking. Actually more people have accidents right at home than anywhere else.

By avoiding accidents you save more than suffering and worry—you save money, too! In a family the size of ours (we're now over 31,000), these savings are important. That's why our employees are not only thoroughly trained to use safety tools and methods, but continually reminded to take every precaution to avoid injury to themselves and others.

It's another way we help keep costs down so we can provide you with the best possible telephone service at the lowest possible cost.

How to prevent home accidents is shown in "Home Safe Home", a folder available free from the Health Department of your Provincial Government or from the Department of National Health and Welfare, Ottawa.

King Trustees Buy Fire Truck For \$2,325 - Seek Volunteers

Chairman of the King City village trustees Donald Findlay, trustee Alex Campbell and fire chief Harry Jones of Aurora Fire Brigade visited the War Assets Corporation at Smith Falls, Ontario on Saturday to inspect a three-ton Ford Fire Truck which is available. The township council had given approval for the purchase of a fire truck earlier and the trustees purchased the truck for \$2,325.

Problem of Volunteers

One of the problems facing the village will be a volunteer fire brigade during the daytime as a number of the men work in the city. Trustee Robert McLeod suggested the women form a brigade during the daytime as they do in some western areas. Trustee McLeod said that they would need sixteen men, two captains and a fire chief in the volunteer fire brigade. They would need to have two practices a week for a while then one practice a month.

What Every Child Needs (No. 3 in a Series of 4)

In order that children may grow and become people who are good parents, good mates, good workers, good neighbors and good citizens, two of the basic needs which must be satisfied are:—

SECURITY—

Every child needs to know —that his home is a good safe place he can feel sure about

—that his parents will always be on hand, especially in times of crisis when he needs them most

—that he belongs to a family or group; that there is a place where he fits in.

GUIDANCE

Every child needs to have —friendly help in learning how to behave toward persons and things

—grownups around him who show him by example how to get along with others.

Can Not Get Clear Title To Meadows Subdivision Lots

Norman Hooper, King Side Road, brought an appeal to King Township Council recently to lift the restraining order on the Meadows Subdivision at Oak Ridges, in which subdivision the Hooper house is built. Mr. Hooper wanted a clear title to his property immediately.

In December, 1951, he bought two lots, 27 and 28, on the King Side Road, from C. A. Meadows and Associates. He bought them in good faith, he said, under agreement.

Issued Permit

He was issued a permit by King Township building inspector, and began building his home. In April, 1952, a by-law was passed in King Township placing restrictions on housing, size of plots, etc.

Mr. Meadows did not carry out the demands of this by-law in the Oak Ridges Park Subdivision. Mr. Hooper finds that he cannot get a clear title to his property of two lots.

Blames Township

He came to Township meeting blaming the township for allowing him to build, for placing restrictions on the subdivisions, and for the difficult position he finds himself in, after three years. A month ago, when trying to arrange a mortgage, he discovered that he had troubles. He has been getting the run around for the past few weeks, he said, and finally came in a fighting mood to Township Council.

Council Expresses Regret

"We are all sorry for you fellows," said Deputy Reeve William Hodgson, who wondered where people get the idea a building permit gives them the deed to their property. A building inspector cannot refuse to issue a permit, unless the building does not comply with requirements.

Mr. Hooper's building apparently met these requirements. Council Blames Ontario Govt. "King Township is not to blame
