One of the landmarks of King City is being converted into living accommodation. The large structure on the Armstrong property on the west side of Keele Street and south of the "hotel" will provide a spacious second floor apartment including a dining-living room with picture windows lending a magnificent view of the rolling hills to the west. The ground floor will contain Miss Dorothy Armstrong's music studio and facilities to accommodate her pupils.

Renovate St. Andrews

Renovations are being made to the interior of St. Andrew's Presbyterian Church, Strange (known as the Stone Church). Panelling of limed fir plywood has been applied to the front walls of the church auditorium. The minister, Rev. Donald C. Wotherspoon B.A., this past week constructed a baptismal font of B.C. Fir, modern in design and of workmanship that would do credit to many an experienced craftsman.

Further improvements to the church are planned, such as the cementing of the furnace room and the building of a new chimney on the exterior of the church from basement level.

All work including the electrical work is being done by members of the congregation and the minister.

The congregation was founded in 1837 in a log church within 20 feet of the present building constructed in 1860.

Rev. Wotherspoon, minister of the three charges of St. Paul's ninth line, Eversley and Strange will be on morning devotions this week over CBL at 8.15 a.m. He chose "Faith in God" as his topic for his first broadcast on Monday morning.

Kitchen Help

It is a nutritional mistake to use baking soda to preserve the fresh color of vegetables during cooking—ordinary heating with baking soda destroys the vitamin C content completely.

The liquid surrounding the solid vegetables in a can is useful nutritionally. It contains dissolved minerals and vitamins and should be used.

Vitamin A which promotes growth, builds resistance to infection by keeping the lining tissues of the body organs in healthy condition, and is necessary for correct functioning of the eyes, is found in liver, fish oils, yellow and green vegetables, milk, cream, butter, egg yolk, green and red peppers.

ANYONE who ever visited London knows Piccadilly Circus, and the famous statue of Eros, God of Love, poised above its central fountain. This statue has taken a lot of punishment during the past sixty years, from both practical jokers and London smog. But because the sculptor cast it in aluminum — it was the first large statue to be cast in the "new metal" — it has come safely through the years. When it was cleaned up for the Coronation, it gleamed as freshly as ever. The enduring beauty of aluminum has meanwhile made it a favorite of modern architects, furniture designers, decorators too. Saving money... and writing cheques

A bank offers you two types of deposit account, Savings and Current.

If your main purpose is to save, to accumulate funds, it's good to have a Savings account.

If you write cheques frequently, you will like the many advantages of a Current account.

The money you leave in a Savings account earns interest, and your bank book gives you an up-to-date, continuing record of your financial progress. If your funds are active, with frequent deposits and withdrawals, a Current account provides a special service; a monthly statement, together with your cancelled cheques—useful as receipts and a ready reference for budgeting, bookkeeping and other purposes.
