THE PEST

There are hundreds of species of flies, most of them just harmless nuisances and some, like the housefly, dangerous carriers of disease, contaminating food which is not properly protected. Even in late summer, it is still necessary to destroy these pests so they will not survive the winter to breed in millions. Fly sprays should be used from early spring until late fall.

Off to Ireland is the symbol of world tractor plowing supremacy, the Esso Golden Plow, for which teams from an expected 15 countries will compete at Killarney, Eire, October 8 and 9 in the second world contest. How Banking keeps pace...

New ideas in bank premises give you speedier, more convenient, more informal banking service.

The chartered banks have opened many branches in recent years to meet the needs of growing Canada.

Modern machines help bank staffs keep up with greater use of services by more and more customers.

Today Canadians have 9,200,000 deposit accounts in the chartered banks—3,800,000 opened in the past ten years. Within the same period, branches have increased to 4,000; bank staffs have almost doubled to more than 50,000. Banking has grown in size and scope, continually adapting its services and improving its methods of operation, keeping pace with the greatly-increased banking requirements of the Canadian people.
