## The most compact baler ever built!

**NEW HOLLAND'S Sensational MODEL**  
Engine Driven or Power Take-off  
Makes hay baling practical on almost any farm... makes square, man-size bales  
Costs hundreds of dollars less!

**The surprise of a lifetime!** That's the New Holland Twine-Tie "66"! We'll wager you've never seen a baler so compact in design, so completely new! You'll be amazed the first time you see the "66." It's shorter and lower than most balers. It's designed to operate with a one or two-plow tractor. It's priced so low that even small-acreage farmers can now afford the finest in baling equipment.

**Now you can enjoy the benefits of having your own baler on the farm.** You can bale your hay the moment it's ready to come in, and bale it fast for minimum spoilage by sun or rain. New pre-compression baling action gives the "66" unusual capacity. It can kick out 6 square bales a minute... package up to 7 tons of hay an hour! And it bales anything—clover, prairie hay, sudan grass, maize.
