DADDY NETTED THIS ONE—Sucker fishing time finds dip nets busy on countless Ontario streams each spring. Isabelle Major, 3, shows one of the ugly but edible coarse fish caught at Alliston, Ontario.

Farm News & Commentary

By Keith Russell
CBC Farm Commentator
How Many Beef Producers
even sympathetic ones, would
bother to apply for a ten cent
rebate on each animal marketed?
Figuring that the number will be
small, the Ontario Beef Producers
Association is confident that
they'll collect \$40,000 or more to
build their organization and promote
the sale of beef. Collections will
be on the basis of ten cents for
mature cattle and five cents on
calves for each of the 600,000
odd head marketed annually in
Ontario. Deductions will be
collected at stockyards and
slaughter houses, then turned
over to the Association. Shippers
not wishing to contribute may
apply to the Association for the
return of the amount deducted.
Paper cord instead of binder
twine is recommended for tie-

ing sheep fleeces. Loose fibres
from binder twine get wound in
with the fleece, are impossible to
remove, and greatly lower the
value of the yarn.
Ten per cent increase in Ontario
4-H clubs is predicted for this
year, with dairy, swine and
grain clubs accounting for most
of the difference. Increased interest
in swine clubs is attributed
mainly to the change in policy
whereby members can raise
one sow and one barrow, instead
of two sows; they don't have to
wait so long for financial returns.
Dirty air breathers for tractor
carburetors increase the fuel
consumption.
Federal livestock marketing
Chief Ralph Bennett predicts
that with the present rate of
increase of population in North
America, by 1975 there will be
no such thing as food surpluses
in this country.
Bulk handling of milk, while
recognized as imminent by dairy
producer groups, is not getting
their encouragement. American
figures show that dairies completely
converted to bulk handling can
save from ten to fifteen cents
per hundredweight. The
suggestion is being made that
organized shippers might be able
to reach agreements with local
dairies whereby part of the saving
could be returned to the
producer to help pay for bulk
cooling tank installations.
Further on bulk cooling tanks
tests show very little danger of
causing rancidity and increased
bacteria by mixing warm morning
milk with cold night milk,
because the morning milk is added
a few gallons at a time. Added
gradually, temperature rises
are slight, and it is temperature
rises, of course, that cause rancidity
and increased bacterial
growth.
Storage of quick frozen eggs
in home freezers is practicable,
and in view of higher egg prices
next winter, advisable. Recommendations
call for frozen storage
either in sugar syrup or in
salt, depending on the intended
use. Whites and yolks can be
frozen together or separately.
Vaccination for swine Erisipelas
when the pigs are in the
weaning stage has given 100 per
cent immunity for four months,
eighty per cent protection for
seven months.
The urban worker's average
hourly wage will buy twice as
much bread, milk, and chicken
and three times as many oranges
and canned tomatoes as it would
30 years ago.
European foulbrood of bees
can be controlled by antibiotics
terramycin and streptomycin, if
treated early.
While Provincial and National
Federations of Agriculture
have depended ties with labour
groups, Farmers Unions are
promoting closer affiliation of
farm and labour groups.
Five pounds of feed per dozen
eggs produced is the maximum
consumption allowable for
profitable egg production, according
to poultry-men. Single-purpose
laying breeds that eat more will
need to be culled.
