What are the chances you will borrow money this year?

1 in 10?
 1 in 4?
 1 in 20?

HOUSEHOLD FINANCE
 Corporation of Canada
 CANADA'S LARGEST AND MOST RECOMMENDED CONSUMER FINANCE COMPANY

YOU may not borrow at all this year, but during 1955, over 1,000,000 Canadian families—one out of four—will borrow from consumer finance companies.

Often this is the average family's only source of prompt money help in an emergency.

But cash credit is no magic wand, no Aladdin's lamp. That is why Household Finance—Canada's largest consumer finance company—advises its customers not to borrow unless a loan is the best solution to their problem.

By making only loans that help people to help themselves Household Finance has become Canada's most recommended consumer finance company. Today in 170 branch offices from coast to coast, we make helpful loans to more families than any other company in our field.

Tour of The Southland
 Mr. and Mrs. Ross Kerwin and three of their children, David, Judy and Stephen, have just recently returned from a three weeks motor trip to Florida, and they tell us that on their way south, travelling by way of Baltimore, the flowers were all in bloom early in April.

Travelling southward through Virginia and north and south Carolinas they saw the farmers and negroes busy with tractors and mules, planting tobacco, cotton and peanut crops. They passed through Georgia and were told that a heavy frost had ruined most of the peach and pecan crops. Even the blooms of the magnolia trees had been killed.

In Florida the Kerwins stayed at St. Petersburg where they visited various beaches and enjoyed several boat trips, one out to Mullet Key about 25 miles out into the Gulf of Mexico, where there is a large display of marine life. They also visited MacDill Field, near Tampa, where there is a large air-training field.

Birthdays
 Birthday greetings on Tuesday, May 17, to Mrs. Lorne Clubine, and to Joyce Downing, on May 19.

1st Jefferson Brownie News
 Brown Owl Mary Enns and Tawny Owl D. Little, leaders of the 1st Jefferson Brownie Pack, hope there will be a good turnout of parents for the Rally held at Aurora Park this Saturday, May 14, from 1:30 to 6 p.m.

Parents should bring a lunch with them and something to drink for themselves. The Brownies are to take a lunch and ten cents for soft drinks.

Last Saturday morning 13 of the 16 Brownies in the pack met at Jefferson school at 10 o'clock and hiked into Passmore's bush, where they played games and practised ball-throwing for the Rally this Saturday.

They had a campfire and made hot cocoa to go with the lunches they had brought from home and

Here's why Chevrolet
out-V8's
 all comparable makes!

Learn what engineering leadership brings to V8 power

Better all-round performance
 Chevrolet's "Turbo-Fire" V8 makes use of General Motors' long experience in making unbeatable V8's for high-priced cars. That's why Chevrolet's V8 performance is unrivalled by comparable makes.

Modern 12-Volt electrical system
 This 12-volt system, with its hotter, faster spark, is exclusive with Chevrolet in the low-priced three. It gives faster, surer starts on cold mornings, and provides a big supply of reserve power.

Controlled full-pressure lubrication
 Controlled full-pressure lubrication results in greater oil economy and in finer engine protection. The oil is forced to every working part of the engine.

Highest horsepower per pound
 In Chevrolet's "Turbo-Fire" V8, thorough engineering has eliminated all the dead-weight and unnecessary bulk—both factors which drain the rated horsepower of engines in comparable makes.

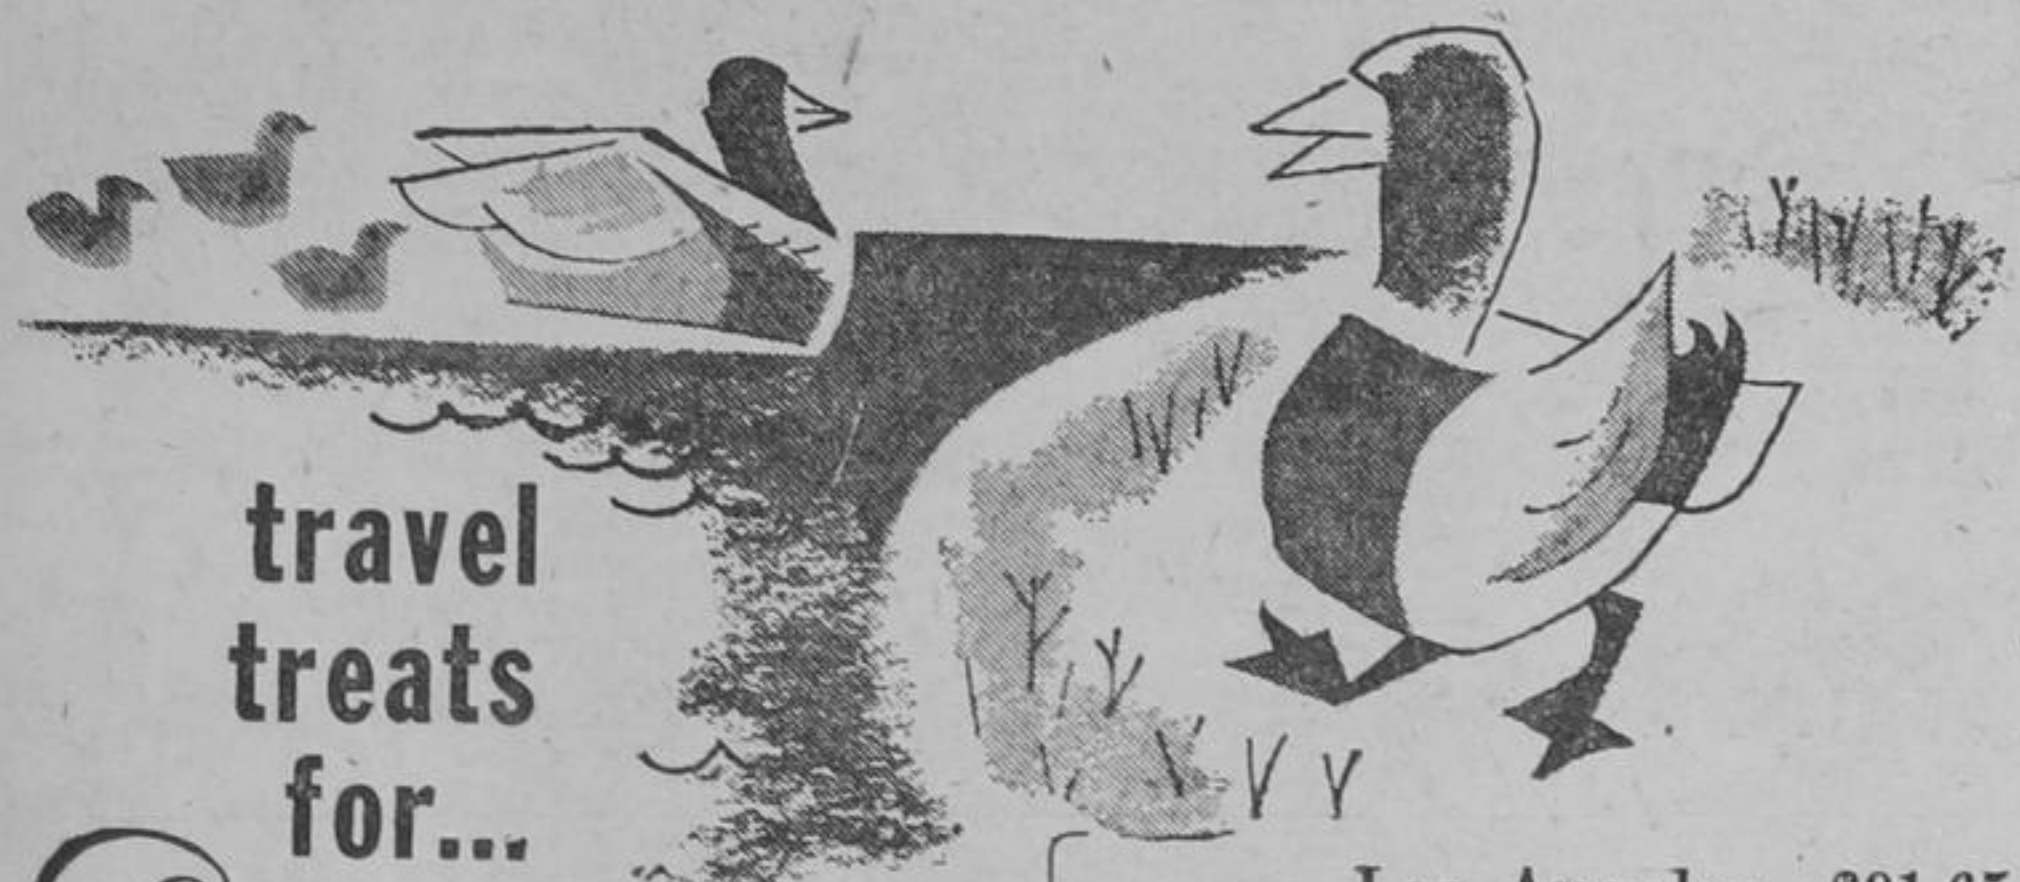

High compression economy
 Chevrolet V8 has a compression ratio that is unsurpassed anywhere in its field. In fact, its compression ratio of 8 to 1 puts the "Turbo-Fire" V8 in the performance class of high priced cars. You can feel the result the instant you put your foot down on the accelerator. And, of course, high compression means high economy.

Now, shorter piston stroke
 In Chevrolet's "Turbo-Fire" V8, the piston moves only three inches—reducing cylinder wall friction, friction heat and making possible greater efficiency.

Saves 1 mile of engine wear in 12
 Because the piston moves a shorter distance, it actually saves 1 mile of engine wear for every 12 you travel. This also puts lighter loads on the bearings!

Only Chevrolet offers you the choice of a V8 or 6 in All models and All series
