Trustee Charges 'Board Weak'

Heated Discussion Ends In Deferred Decision On Thornhill H. Sch. Addition

After a heated discussion lasting more than an hour and a half, the Trustees of the Richmond Hill District High School Board last Monday night left the subject of a proposed addition to the not-yet completed Thornhill High School hanging in mid-air until more satisfactory figures can be obtained. Nearly the whole meeting was monopolized by this subject which was reopened on a motion by Trustee Robert Edean to rescind a motion of a previous meeting approving an extension of the gymnasium and addition of a cafeteria at a cost of \$75,000. After the latter motion was carried, it was found that the proposed addition could not be built for the price cited and there was a feeling among some Board members that the motion had been pushed through when several members were absent. At the time, the decision was made on the majority of one.

Trustee Stewart Rumble who seemed to be on the defensive during the entire discussion protested that the matter had been turned down by the Board before and called it ridiculous that the subject was now being reopened.

Trustee Rumble charged that the Board has lost confidence in itself. "This Board tried last year to keep the school costs down below a million dollars but these proposed additions of a cafeteria, extra shop and extension to the gymnasium will put it back over the million mark again," he contended. "Not at all," interjected Chairman V. P. McMullen, "the figures have changed so rapidly that it has become necessary to revise our plans and our thinking."

Trustee Dean, Chairman of the Building Committee, told the Board that the architect had estimated the cost of the extension as follows: Gym, \$41,834; Cafeteria, Kitchen and Shop, \$62,400; Kitchen equipment etc., \$6,000; Electric Door (to separate double Gym) \$13,000; architect's fees, \$7,200 for a total of \$130,434. Mr. Dean added that the Board would probably save \$20,000 by doing the work now. Trustee Rumble commented that likely the architect's fees were low as was provided in the present construction.

Trustee Rumble asked what would happen to the balance of the students in the event that only one shop was available. Mr. Kinnee replied that if a student was determined to take shop work, the Board could be forced to open a shop.

Attendance Figures
Principal A. S. Elson of Thornhill High School told the Board that with anticipated attendance figures compiled for Thornhill for next year, it appeared that there would be approximately 55 periods of shop warranted while a single shop can only provide 45 periods per week. A further survey estimated that if the proposed Woodbridge High School was not opened by the '57-'58 term there would be a possible 80 to 85 periods per week for shop required with the same 45 period single shop. Mr. Elson's report also pointed out that with a possible extension of the lunch hour 60-70% of the students would remain for lunch. The report contained a detailed analysis of the situations existing in a school when a cafeteria is not in operation.
