Here! New Task-Force 57 Chevrolet Trucks!
Performance-proved in a history-making test on the ALCAN Highway to Alaska

Here are the trucks that conquered the Alcan Highway - one of the world's most challenging roads! Six new '57 Chevrolet trucks, loaded with cargo, roared north from Dawson Creek, B.C., through 1,520 miles of mountains and mire, rain and hail - every conceivable natural roadblock - to Fairbanks, Alaska. Running around the clock, they made this tortuous trip - normally a 72-hour run - in less than 45 hours.

Like a carelessly unwound ribbon, the Alcan Highway twists and reels for 1,520 miles. It tumbles over towering mountains of awesome beauty and wanders through desolate Yukon forests. A miracle of engineering - but a brutal challenge to trucks.

It's the road where trucks grow old before their time. The road where gravel endlessly

sledgehammers the life out of trucks. Where a fog of superfine dust chokes engines, and vicious ruts subject chassis to months of wear in a few hundred miles.

This is the road that was chosen to give the new '57 Chevrolet trucks a supreme test of stamina, performance and handling ease. The results of that test made hauling history!

Six new Chevrolet trucks - representing light-, medium- and heavy-duty models - travelled the length of the Alcan highway in less than 45 hours. They ran day and night - but this was no test of speed. It was a measure of the ability of these new Chevrolet trucks to perform under typical conditions on the truck-killing Alcan run. The Chevrolet fleet made normal stops along the way, and maintained safe and legal speeds. As a special additional test during the run, two of the trucks went the entire distance without once having their engines stopped!

It's all down in the AAA record book. And more besides! Never before has a new truck been so thoroughly proved. Come in and look over these new Alcan champs!

FIRST WITH THE MOST MODERN FEATURES!

New 283-cubic-inch Taskmaster V8 delivers 160 high-torque horsepower. Standard in Series 1800 and 1700, optional in Series 1300 through 1600 at extra cost. Horsepower ranges up to 220 in Chevrolet's complete line-up of modern V8 and 6 truck engines. Revolutionary Powermatic Transmission! This six-speed automatic, designed specifically for heavy-duty hauling, is an extra-cost option in Series 1600 through W1900 models. Hydraulic is offered in 1300, 1400 and 1500 Series models at extra cost. New 1957 work-styling gives Chevrolet trucks an even fresher, fleetier appearance. There are three different and distinctive treatments.

Low Cab Forward models outdate the C.O.E. because they're lower, handsomer, easier to get into and out of, and save time in routine engine maintenance. Yet they offer all the traditional Cab Over Engine advantages. Heavyweight Champs with Triple-Torque tandem are rated at 32,000 lbs. GVW, 50,000 lbs. GCW. And Chevrolet's advanced tandem rear axle unit offers a built-in three-speed power divider - plus a unique "self-steering" action that reduces tire wear and increases handling ease.

(AAA) The Chevrolet Alcan run was sanctioned and official results certified - by the American Automobile Association.

Proved on the Alcan Highway... Champs of every weight class!

Alcan fleet reports up to 20 miles per gallon! That's based on official AAA fuel consumption figures for the Cameo Carrier, powered by the famous Thriftmaster 6 engine and equipped with Overdrive (optional at extra cost).

All the way in DRIVE range with Powermatic! As a special test, this Powermatic-equipped 1900 Series tractor travelled the length of the Alcan Highway - up mountains and through washouts - in a single forward-speed range!

New Super Taskmaster V8 flattens Yukon mountains! This 1957 1800 Series truck with its new 283-cubic-inch V8 engine was more than a match for Alcan mountains. It climbed towering grades with jackrabbit agility.
