

Guest Speaker

Mrs. Jean Newman
Controller - City of Toronto

At the annual spring luncheon of the Women's Association of Richmond Hill Presbyterian Church on Thursday, May 22, Mrs. Newman will be the guest speaker and has chosen for the title of her talk, "Changes Are Inevitable".

As the leading controller in last year's Toronto civic elections, she became vice-chairman of the board of control and was appointed president of city council.

If Conditions Warrant

Town Public School Board Plans 12 Room Addition To Walter Scott School

Richmond Hill Public School Board accepted the recommendation of its building committee (Trustees Robert Ross and Harold Sanderson) and its architect, Thursday of last week, for a twelve room, second story addition to the Walter Scott Public School in the event extra classroom space in the Markham Road location becomes necessary. The architects are Allward and Gouinlock of Toronto.

Trustee L. D. Clement, head of the planning committee, asked the decision of the board as to whether or not to proceed with the building held in abeyance until the planning committee (Trustees Clement and J. Rabinowitch) has prepared a new report on the classroom space both present and future needed in the district. The planning committee pointed out that in the past it is sometimes wiser to provide portable accommodation if it felt the pupil population will level off after the next few years.

The lots to be built on at Rumble Ave., were briefly discussed and it was felt a portable at the MacKillop School would solve the problem of an influx of students from this subdivision. The plan of subdivision from Inspector W. J. McLeod was referred to the planning committee for study.

Chairman Ross was critical of the fact that minutes of the planning board meetings are not being received by the school board. However, council minutes are being received.

Province Reduces Approved Figure

A letter from Inspector McLeod informed the board final approval from the Department of Education for the Crosby School was \$215,500.00. Previously the total final approval had been announced as \$240,000.00. It is believed the smaller amount will have the architect's fee added to it.

In his report, Supervising Principal Duard Rose pointed out that small groups of houses are being constructed in the town. It was mentioned that these small units create their own school planning problems. Often more so than the larger developments.

Kindergarten Re-registration

Mr. Rose said the dates for September kindergarten enrollment were to be published in "The Liberal" this week.

An induction programme for twelve new teachers will be conducted Tuesday, Wednesday and Thursday so that they can get a picture of the school system.

A letter from the district Kinsmen Association asked for a night at the Beverley Acres School playground for their Pee Wee team. They were referred to the Beverley Acres Ratepayers' Association who were granted use of the school grounds after school hours last year.

On the understanding the board will not be responsible for accidents after school hours, a soccer team coached by Police Chief R. Robbins was granted permis-

School Area

Orthopedic Class Held 100% Attendance April

The Board of Trustees for School Area No. 1, Markham-Vaughan met for their regular monthly session on Tuesday evening of last week in the Thornhill board room which was decorated with a number of excellent posters done by school area students to illustrate the theme "Safety". This poster collection, the result of a school contest, is to be on exhibition soon at the Thornhill Library and is worth watching for. It was displayed last Friday night at the formal opening of the Ross Doan Public School.

Chairman Roy Bick, in commenting on the choice of safety slogans used, the excellent free-handprinting and the eye-catching colours employed to put each "caution" across to the viewer, said that a safety bulletin will be released soon by the area schools. Thornlea Home and School has given a cheque to cover the costs of paper and stencil supplies for this service, he said.

Another project shared by pupils and teachers, this time with school custodians also taking part, was the beautifying of the school grounds, particularly at the new Ross Doan school. Trustee Jackson Taylor, remarked the grounds at the various schools look nicer than he had seen them in a long time.

Kindergarten Class

It will not be necessary to provide transportation for the children attending kindergarten classes in the school area. Chairman Bick told the board, since all the schools will have classrooms for their own school section. A recent survey indicated that there are approximately 200 children in the area who will be five years old on or before December 31, and therefore eligible to enter kindergarten in September.

It was noted that many private kindergartens will close, but private nursery schools will remain open.

Principal's Report

Supervising Principal E. J. and reported to the board there was an improvement in the overall picture of attendance for April. A total of 1,969 pupils were on the rolls with an attendance percentage of 95.5.

Of the orthopedic class, Principal Sand said, "I have never before seen a 100% attendance in one room for a whole month. But this class, which one might feel was the least likely to attain such a record, did so in April."

No Teacher Shortage

All teacher requirements for September have been filled for the area schools. Chairman Bick told the board, and supplies for

the kindergarten and primary classes have already been purchased.

University Extension

Principal Sand informed the trustees that at the last principals' meeting an attempt was begun to get university extension work up in this area. "This is a very worthwhile effort," he said, "and it may be we can establish it in this area, or in Richmond Hill." To which Trustee J. Taylor advised, "I think if the board can do anything to help this, they should give the principals every support."

Architects Show Film

Jackson and Ypes, construction engineers and architects, appeared before the board and presented a series of coloured slides to illustrate the type of construction they have employed in building schools in Richmond Hill, Stouffville, Owen Sound, Pickering, etc. stating they would welcome an opportunity to serve the board when future schools are planned for the area. Chairman Roy Bick thanked the architects for a very interesting evening, in which all the trustees had joined in asking questions.

from types of flooring, heating and plumbing that were most practical; on to how windows should be hung, or what finish should be employed in walls.

Vice-chairman Allan Parker, who some time ago presented an elliptical type of school plan to the board, asked Mr. Jackson if this would not be a new and practical approach to school-housing, to which Mr. Jackson replied they are now working on a square hall school plan, that might prove even more economical and striking. This plan however has not yet been approved by the Department of Education.

York County Hospital News

by Caroline Edwards

The shortage of trained personnel in almost every technical and skilled phase of hospital operation continues to be one of the most pressing problems facing the hospitals of our province. For this reason and also because at this time high school students are choosing their careers, a review of the opportunities offered in this field is in order.

Your hospital is held in high esteem in your community, for it provides round-the-clock service for the sick and injured. It is a modern, highly developed, scientific institution employing many skilled, educated people. Hospitals offer interesting, vital careers for young people who wish their lives to be of service to others.

The three following listed professions offer opportunities in hospital careers:

The Dietitian: is a member of the hospital professional team, and regardless of the size of the hospital, her duties are many and varied. She actively participates with the administration of the hospital through supervision and training of staff; planning and layout; purchasing and installation of equipment; procurement of food supplies; preparation and service; and general sanitation of the food service department.

Entrance requirements are usually Grade XIII, with a standing of 60% in the subjects selected. Grade XII is permissible only at the University of Western Ontario, London, providing other requirements are met. Some courses may be completed in three years; others require four years.

The Laboratory Technologist: aids the doctor in the diagnosis and treatment of disease. Young students with an aptitude in the sciences who desire to employ their talents worthily in the service of the sick have in this field a very absorbing and satisfying career open to them.

The minimum requirements are as follows: senior matriculation or its equivalent with two senior matriculation sciences, one of which must be chemistry, and the other, either physics or biology, and two senior matriculation mathematics. The course itself consists of from 12 to 24 months of clinical training in an approved training school laboratory associated with a hospital.

The Medical Librarian: is the "custodian" of the medical records. She co-ordinates and organizes information submitted by the various departments so that a complete file of the patient's record may be available for the care of the patient, education, promotion of research, and prevention of disease. This profession is a new one in the hospital field but one that has an important role to play in relation to the hospital as a unit.

The requirements for this course are senior matriculation or diploma of graduation from a nursing school, and in addition proficiency in shorthand and typing.

Further information about hospital careers will be available at York County Hospital on National Hospital Day. The date this is being held at York County Hospital is May 21, 1958, and all high school students in the district interested in hospital careers are invited to attend and see at first hand the work that goes on behind the scenes and meet the people engaged in the many aspects of hospital operation.

Friend Of Many, Dave Rennie Dead Funeral Fri. From St. Mark's Church

Dave Rennie is dead. He died at 3 o'clock on Tuesday at the Wellesley Hospital, Toronto, after a losing fight with cancer. In good health until last October, Dave spent the last three months in hospital.

Born in Toronto, Mr. Rennie and his wife moved to Lake Wilcox five years ago. There are four children ranging in age from 16 months to 11 years.

A public-spirited man, Dave Rennie was one of the first mem-

bers of the Lake Wilcox Recreation Association and will be remembered by most of the Lake Wilcox children for his comradeship and help. He served on the Lake Wilcox School Board for two years but was forced to retire early this year when his illness became acute.

Funeral services for the late Mr. Rennie will be held on Friday at 1:30 p.m. in St. Mark's Anglican Church, Oak Ridges, the Rennie's family church. Interment will be in King Cemetery.

Town Hydro Approves Yonge Street Lighting

On motion of Mayor Ken Tomlin and Chairman Sam Cook the Richmond Hill Hydro Commission agreed Thursday of last week to erect a new system of street lights on Yonge Street. To be erected at an estimated cost of \$10,000 the new type mercury-vapour lighting will extend from the southern limits of the town at Harding Park Boulevard to the northern limits at the Elgin Mills Sideroad. These new lights will replace the present system of street lights. For some time now the commission has been studying an improved street lighting system for the important Yonge Street area. It is planned to start work on the project at once.

Commissioner Douglas Dingwall tendered his resignation effectively immediately. One of the original members of the commission when it was first established in 1957, Mr. Dingwall has entered the natural gas industry. He is a resident of Beverley Acres. A new appointment to the three member commission will have to be made by the town council.

The commission has been notified that its three linemen, meter reader, and apprentice have all joined the International Brotherhood of Electrical Workers. Su-

perintendent V. Snider will attend the summer technical conference of the A.M.E.U. to be held in Hamilton during June.

It is hoped the town will grant permission for the erection of the new substation to be located in the north-east part of town on public property.
