County Council

Requests Flasher Signals For Level Railway Crossings

York County Council has requested the installation of flashing light signals at all level railway crossings on county, suburban and provincial roads within the county. At the June session, a resolution introduced by Reeve Walter Rate of East Gwillimbury Township was approved unanimously. Mr. Rate referred to the recent fatality at the Mount Albert crossing when he emphasized the need for level railway crossings to be protected by flashing light signals. "No. 48 highway is busy and will become more heavily travelled when the southern section is improved," he said. "There is no reason for this risk to be permitted. The same risk exists on all county and provincial roads where level crossings are not protected with flashing signals." The recommendations will be forwarded from York County to the Board of Transport Commissioners in Ottawa and the Department of Highways. T.Y.R. Applications An application has been made to the commissioners for the installation of new flashing light signals at the C.N.R. crossings of Keele St., north of Maple, and of Dufferin St., north of the King Rd., the Toronto and York Roads commission reported to council. Application has been made also for more adequate protection to the crossing in Aurora and for the relocation of signals and extension of protection at the crossing in Newmarket, on Davis Dr. The transport board have approved these applications. They have directed the C.N.R. to proceed with the installations as requested. The board have directed that the cost be split three ways. Sixty per cent will come from the grade crossing fund. The Toronto and York Roads Commission will pay 25 per cent and the balance 15 per cent will be paid by the railway. Discussions have been held with the engineers of the Board of Transport Commissioners and the Department of Highways concerning the relocation of the roadway at the Mount Albert crossing, the report stated. No definite recommendation has been made to date. Study of the proposal is continuing, explained Chairman A. K. Graham of the county road commission.
