After the students have been informed that they have been nominated and have accepted nomination he or she then begins his campaign for the particular position. When the elections are held the students vote the same way as adults would vote in a municipal election. Regular meetings of the council are held to deal with problems and activities which pertain to the student body. For example they administered student funds.

This year Barbara Bain, Peter Kerslake and Sherrill Williams are running for the presidency with the runner-up of the opposite sex to be vice-president. Marjion Bales, Jennifer Crank and Judy Purvis are the candidates for secretary. Barry Smith was made treasurer by acclamation due to lack of opposition. The immediate past-president is Stuart McCowan. Staff supervisors will be Mr. W. Ellis and one other teacher appointed by the principal.

Among the many and varied slogans of the candidates here are two examples. "The busy Bee's—Bain and Bales", "Get on the right track and vote for Crack".

**Ontario Hydro Cuts Cost Of Electric Space Heating**

Ontario Hydro has announced that the monthly service charge of \$4.00 a kilowatt for electric space heating which was established in 1924 has been eliminated and a new rate schedule introduced. Residential consumers using electric energy for space heating will now pay only for the number of kilowatt-hours consumed.

The commission expects that the new rate schedule, combined with the inherent advantages of electricity, will attract many new users. Cited by Ontario Hydro as the main advantages of electric space heating are safety, cleanliness, and the comparatively low cost of installation. Fine control of temperatures in individual areas of the home may also be achieved with an electrical system.

In announcing the new rate schedule, Ontario Hydro stated that domestic-type customers will be billed in one of two ways, depending upon the amount of floor area heated. Those using electricity to heat less than 25 per cent of a dwelling's floor area will have such energy registered on existing meters and will be billed at current domestic rates.

Those heating more than 25 per cent of a dwelling's floor area will have the energy metered separately, and will be billed at a special rate. For rural domestic customers of Ontario Hydro, this rate will be 1.5 cents net a kilowatt-hour; for domestic customers of municipal utilities, rates may vary slightly, but the minimum rate will be 1.5 cents net a kilowatt-hour.

Commercial and industrial customers will pay current commercial and industrial rates for all electric energy used for space heating purposes, regardless of the floor area involved. In order to ensure economical operation of complete electric house heating, certain amounts of insulation are essential, not only

in ceilings, but also in walls and floor areas with unheated space below. Because of this, complete electric house heating is likely to appeal most to new home builders, who can incorporate such insulation in their construction plans.

Installation of such a system, however, does not require motors, furnaces, ducts or chimneys and, therefore, saves space and high initial costs. The absence of such equipment also eliminates the problems of noise, maintenance costs and fuel storage.

**DO YOU KNOW**  
THREE WINTER MONTHS  
You use and pay for **OVER HALF** of your whole year's supply of FUEL!

**Rogers Fuel Oil Budget Plan**

Can Help You Overcome These "HEAVY COST" WINTER MONTHS

**Here's How It Works!**  
We estimate the quantity of oil that you will use in a normal heating season, then multiply this by the current price per gallon in order to arrive at an approximate estimate of your heating cost. We then divide this total into nine equal consecutive monthly payments.

As oil deliveries are made to you during the season, you will receive with each delivery, just as you always have, a meter ticket showing the quantity of oil delivered and its cost. As heating costs vary from year to year, and as we can only estimate your fuel bill, you may be overpaid or you may owe us a small balance at the end of the season; any difference will be settled between us at that time.

If you would like more information on our Budget Plan, just complete the coupon below and mail today.

Gentlemen: Please have one of your representatives contact me at my convenience to give me additional information on Rogers Fuel Oil Budget Plan.
