

# Great Woman Astrologer - Dr. Helen S. Hogg

by: Mona Robertson  
 Dr. Helen Sawyer Hogg, president of the Royal Astronomical Society of Canada, is seen above seated at her desk in the Dunlap Observatory (pictured on the right), where she is engaged in research work on "Globular Star Clusters". Apart from her specialized research, Dr. Hogg is well-known as a professor of astrology at the University of Toronto where she lectures once a week during the school term; writes a weekly column in a large Toronto daily; compiles great quantities of material into survey articles; photographs her own slides for illustrated lectures on the stars — taking her own pictures through the 74 inch reflector

at the David Dunlap Observatory — and says she often wishes for a "normal" day.  
 And the foregoing is only one side of the busy and interesting life Dr. Hogg enjoys — for she is also the mother of three children, including a married daughter living in Don Mills with her husband and two sons. Dr. Hogg's eldest son, David, is a graduate of Queen's in Honor Physics and is now working for his Master's Degree. Her younger son, James, who married recently, is a fourth year honor student in Chemistry at Queen's University.
