It's Maple Syrup Time

It's a sure sign of spring when the sap begins to rise again and workers at Amos Baker's Sugar bush in Concord are kept busy from morn till night emptying the syrup pails into the intricate underground piping system that carries the sap to the cooking vats in the "sugar house". The syrup men began last week.

Here are two recipes we feel you'll enjoy adding to your files:

MAPLE SUGAR CANDY

You'll find Maple Brittle and Maple Fudge easy to make and delightful in flavour. Why not make some of each? While you're at it wrap up a pretty dish full of candy to take along to a shut-in friend next time you visit them.

Maple Brittle

Combine 2 cups maple syrup, 2 tablespoons butter, ¼ teaspoon cream of tartar and a few grains salt in a saucepan and boil to 280 degrees fahrenheit or until

syrup, when dropped into cold water, forms a rather brittle thread which piles up in zigzag fashions. To prevent formation of sugar crystals, do not stir syrup. Immediately pour into a lightly greased 7" x 7" pan, being careful not to add scraping from saucepan. When firm enough, mark into squares. When cold, invert pan and tap gently on bottom to remove candy. Break into squares.

Maple Fudge

Measure 2 cups of maple syrup and 4 tablespoons butter into a large saucepan and boil to 234 degrees fahrenheit or until syrup just holds together when dropped into cold water, not ice water. Remove from heat and let cool to lukewarm. Then beat until mixture begins to lose its gloss. Pour immediately into a lightly buttered 8" x 4" loaf pan. Cut into squares before it has completely hardened.

CHARLES MONTAIGNE of FRANCE

Charles Montaigne designs for women whose reputations for being well-dressed are based on consistent good taste with nary a thought for fashion fadism. Typical of his art is this step-in model, gently shaped and as perfectly styled for the size 20 figure as is for slimmer sisters. One of "The Liberal's" advertisers of last week, inserted an advertisement which read: "A pair of men's riding boots", several calls were received by the advertiser and the boots went to the customer who got there first.

The former owner of the boots said he had found them carefully put away in his attic, and realizing they were of no further use to himself he inserted a get-re-quick ad. in "The Liberal".

The telephone helps make a neighbourly community — helps us all to live more securely, to get more things done, more easily. Yes, your telephone is a wonderfully low-cost, wonderfully efficient servant.

Richmond Hill Naturalists Club

Mr. T. R. Scovell, teacher at Bathurst Heights Collegiate, and in summer, par naturalist at Presqu'ile Park, was the speaker at the April meeting of the Richmond Hill Naturalists' Club. This area has been a provincial park since 1922 but it is only in the last two years that the camping facilities have been extended to accommodate more people. Mr. Scovell sketched a map on the blackboard showing the topographical aspects which make this spot, second to Point Pelee, as a naturalist's paradise. Mr. Scovell illustrated his talk with excellent coloured slides of many birds which migrate through and also several who stay to nest. The club has planned a trip to Presqu'ile for May 23rd, and now the date cannot come fast enough.
