We Have No Land

Anna and Karlen Ludovnic were refugees. They have a young daughter, Marta. In 1949, after considerable trouble and difficulty, they made their way to Western Germany. There they entered a refugee camp and registered for work and emigration. They also took their physical examinations.

Marta was fine. Her mother was fine. But the X-ray turned up an old scar tissue in Karlen's lungs. He was completely cured, but that made no difference. The regulations stated specifically that tuberculars past or present could not be certified for emigration to another country.

The Ludovnics did not stay in the refugee camp. Karlen had been a wireless operator, and a good one. They went to the seaport of Hamburg, where Karlen thought he might find a job on a ship, and if he did, one day they might land in a country that would take them

He got the job, on a small tramp freighter of Panamanian registry. He was the wireless operator, Anna was signed on as the cook. They had Marta with them and they set sail with hope in their hearts. But, for the Ludovnics, the sea became a lost highway.

The small, battered freighter put in at many ports. When the port officials checked, the answer the Ludovnics got was always the same. "You have no visa? Sorry, no landing permit."

The rolling boat became their home, the ground they walked on was not earth but the hard, steel deckplates of the ship. Their daughter, Marta, got sick. Through much effort, through

a port official in England and a social worker and the authorities, little Marta was allowed on shore. But for Anna and Karlen, no place to stay, no country of their own, no ground to walk on, no home.

The months on board turned into years. One, two, three, four years. Karlen wrote a letter, a last hope letter, to the United Nations. He'd heard that, sometimes, people with no country

could be helped. "We have no land where we have a home and no land will let us in. Please, help," he wrote in his letter which was forwarded to the office of the UN High Commissioner for Refugees in Geneva, Switzerland.

From the UNHCR came the reply - a telephone call to London. And, months later, when the tramp steamer arrived at an English port, an immigration officer was waiting with a letter - a letter giving Anna and Karlen sanctuary. They could land in England. They could live and work there.

Under their feet, for the first time in four years, Anna and Karlen Ludovnic found solid ground. They had found a home.

An estimated 8,000 seamen in the world are refugees - sailors without a country. They are destined never to set foot on dry land, unless the office of the UNHCR can help them. This is one of the objectives of World Refugee Year. For information about the many ways in which you may help refugees, readers are asked to contact Mr. R. D. Little at TU. 4-3736. Mr. Little is Chairman of the Richmond Hill Refugee Committee.

Well Done Guides

In 1909, a group of determined girls almost broke up a Boy Scout Rally in London's Crystal Palace by appearing in strange adaptations of their brothers' Scout uniforms, and insisting on being allowed to join the game of Scout-

Lord (then Sir) Robert Baden-Powell, being an understanding man, worked out a plan for a similar organization, suitably adapted for girls, and thus the Girl Guide Movement was born. Within a year, it had taken vigorous root in Britain and spread to Canada, Australia, South Africa and Finland.

Canada's first company was the 1st St. Catharines Company in Ontario, registered with the parent association in England in January, 1910. This year, with more than 175,000 Brownies, Girl Guides and Rangers, and 25,000 leaders, Guiding in Canada is marking its Golden Jubilee - 50 years of training young Canadian girls for healthy happy and useful citizenship.

What do Guides and Brownies do besides lining official routes, looking trim and neat in their blue or brown uniforms? When a girl joins, she promises "to do her best". She learns to follow the four Signposts of Girl Guiding: Intelligence, Handicraft, Health and Service, for all-round development of her personality. She learns to follow the wishes of the majority, to do her share of the work, to accept guidance from her leaders. Through a carefully-developed series of tests, she learns the elements of home-making, and of how to enjoy life outdoors. From the moment she becomes a member, she learns the importance of good health, by following accepted health rules and studying nutrition and child care.

She may win proficiency badges by developing hobbies, interests which may lead to a chosen career. She learns to appreciate the simple things of life, acquires a love of nature, and undergoes an all-round spiritual development impossible to attain among the artificial amusements of today. Through contacts with other girls of her own age from other parts of Canada and the world, she makes new friends and learns tolerance and understanding of other cultures.

This spring, from coast to coast, a "River of Gold" will bloom in the form of thousands of golden tulips, planted by Guides and Brownies as a Jubilee "Thank You" gesture to their communities. Special Jubilee Camps are being planned during the summer, each attended by girls from every province in Canada. Every Brownie Pack and Guide and Ranger Company will observe birthday celebrations, with birthday cakes and pageantry.

Canadian girls — and their parents - are indeed fortunate to have shared Guiding during the past 50 years with other girls around the world, now numbering four-and-a-half millions. As yet another generation of 8-year-olds solemly promise "to do my best", we are proud to wish Girl Guiding in Canada a "Happy Birthday", to wish them many, many more, and to say, as their late, great Founder and Chief may have said, "Well done, Guides!"

Girl Guides have made a worthwhile contribution to good Canadian citizenship and York County communities are fortunate to have shared in the many benefits.

FACTS and FAITH

A weekly Comment On Christian Life And Action

- By Calvin H. Chambers

Apostle while at the city of Cor- you with that "come hither look." faith. Second, he urges them to immoral conduct. maintain high principles of moral conduct, and to remember that sex must be used as part of God's plan, and is not something to be exploited. Third, he gives them instruction about the triumph of Christ's kingdom in the certain hope of is re-appearing.

When we look at these themes developed by Paul in this brief letter, we see that they still are relevent to our world today. Certainly, Christians are being called upon to suffer for their faith as perhaps never before in the history of the world. Behind the Iron and Bamboo Curtains unmultitudes of people have had to pay with their lives for the faith they profess in Christ Those of us who enjoy the privilege of religious freedom should not fail to remember our brethern in our prayers that they may be able to stand fast in their times of testing. Persecution may come to us in different forms. It is not always the sword or the dungeon which do the most damage to the Church. Often the cold shoulder, the biting tongue. the sarcastic remark made by those who reject the Gospel, is just as hard to bear. But those who are willing to pay the price may have the joy of knowing that they belong to a noble company of men and women in every age who have stood fast for their faith under the fiery attacks of their enemies. The gospel is full of promises of blessing to those who remain true to the end.

Then certainly Paul's message to the Thessalonians on moral purity is extremely revelant in our degenerate society. If the Victorian age was guilty of acting as if sex did not exist, we in this sex dominated age are guilty of acting as if there was nothing more. Television, magazies, adertising appeal to us constantly on a basis of S. A. Our
