Hospital Crisis York County's

York County is a rich and prosperous county. It boasts fertile agricultural lands and well equipped and prosperous farms. It has many fine towns and villages with considerable industry and many thriving commercial enterprises. York's population is well over 100,000 and citizens here enjoy a standard of living second to none in the whole world.

York County boasts many valuable assets. We have fine well equipped schools, many beautiful churches, splendid parks and recreational facilities, modern homes, and in fact almost everything that goes with a good life in this land of plenty and prosperity.

Unfortunately we have only one small hospital located at Newmarket with 113 beds. This is only a quarter of the minimum requirement for our population.

A hospital has become an accepted part of our society, and no citizen can feel comfortable with the shortage of hospital beds in this district. No community such as ours is complete without adequate hospital facilities.

At present a large percentage of our people needing hospital care must go outside the County to Toronto Hospitals. These outside institutions are over-crowded and have not facilities to take care of their own people. The result is that people in our district needing hospital care have to go on a long waiting list, and must wait three or four months for a hospital bed.

It's all very well to line up for a ticket to a movie house or a ball game, but it's just not satisfactory to be forced to line up for a hospital bed. Sickness is no respecter of persons, and sometimes strikes with startling suddenness. Delay often may be dangerous, costly and sometimes fatal.

The need for more hospital beds in

York County is urgent, and should have the serious concern and attention of all our citizens. It is the responsibility of everyone but is a special problem for elected representatives.

BUREAU

IRCULATION

A recent report by the two existing Hospital Boards recommended a substantial addition to the hospital at Newmarket and the construction of a new hospital at Richmond Hill. The amount of local financing required is in the neighbourhood of six million dollars. This is a large sum, and municipal reperesentatives are hesitant to assume such a substantial obligation in the face of already increasing tax levies.

However, it is a crisis which must be faced. There is little to be accomplished by suggesting that hospital construction should be financed by sweepstakes. Desrable though this might be the simple fact is that it is not permitted by law in Canada. Neither does it do much to provide hospital beds to suggest that the federal and provincial governments should shoulder a larger share of the capital costs.

At present there are two ways to get the hospital beds we need. We can pass the hat in a fund raising drive, or have the money raised by debentures and paid by a levy over the whole county.

We regard hospital accommodation as a necessity which should be provided for by public levy the same as education, police protection, or public high-

Citizens of York County are face to face with a crisis as far as hospital acccommodation is concerned. We haven't much time to make up our minds as what we are going to do about it. Undue delay may mean that many will suffer and some may die because of the lack of hospital accommodation.

Railway Commuter Service

The perennial question of a railway commuter service for the fringe areas has once again been raised. Toronto Township Council has asked its development committee to study a request for commuter service submitted to council by Malton Councillor Frank McKechnie. Mr. McKechnie told council if a commuter service was available people who now drive to work in Toronto would leave their cars at home.

For some time now people throughout the fringe areas have been calling on the government owned C.N.R. and the privately owned C.P.R. to provide a commuter service similar to those available in many parts of the United States. Repeated representations have been made to government and railway officials asking for the inauguration of such a service. So far these pleas have

fallen on deaf ears. An advanced system of public transportation is the only real answer to the paralyzing rush of cars that hit

our large urban centres each working day. Clogged arteries and limited parking facilities are the bane of every motorist. Public transportation can take different forms. Bus and subway systems are the more common forms.

The majority of the municipalities adjacent to Metro are served by rail lines which could easily be converted to a commuter service. A metro wide service of this kind would aid tremendously in cutting down on the traffic problems facing authorities today. It would also eliminate traffic snarls during the rush hours and soothe frayed nerves.

Senior and Metro government officials should confer with the railroads in an endeavour to find some solution to the problem. There are obstacles facing the inauguration of such a service but surely with determination and foresight such a badly needed service can become a reality.

Pioneer Days

(By Elizabeth Kelson)

Pioneer Village in the Black Creek Conservation Area has made me conscious of pioneer life. One of the most notable characteristics of pioneer times was the spirit of co-operation. Differences in opinions, religion and politics disappeared when trouble loomed on the horizon. In case of fire, neighbors would offer time and money to repair damage (which they could scarcely afford in those days); in sickness, harvests were rescued by a band of concerned farmers and their wives left their own households to render the nec-

essary aid. It was co-operation that really made pioneer life bearable. Roads were built by the subscription and labour of those who lived in the district; settlers took turns in getting mail and supplies for each other; but the most remarkable effort at co-operation was the "bee" or gathering of neighbors to help with the farm work. All bees provided entertainment and fellowship as well as hard work. Besides large quantities of food and drink, it was customary to

provide a dance as the main amusement. In pioneer days almost every activity was an occasion for a bee. The logging bee was the most typical of pioneer co-operation. All the settlers living within a radius of fifteen miles brought oxen and implements to assist in the enormous task of clearing the virgin land. After the logs were hauled away and burned, the stumps had to be removed from the land. This called for a "stumping bee". Some of the stumps were chopped out and others dragged out by oxen, and many were burned out. The few remaining stump fences in Canada are a reminder of the old time stumping bee. The raising bee is one that has survived to present times. Grist mills, saw mills, houses, churches, stores and barns were raised by the united efforts of the inhabitants.

There were numerous other occasions when the settlers assembled from far and near to help with the farm work . . . and at the same time to enjoy themselves. They were hauling bees, ploughing bees; bees at hay-cutting and harvest time; bees to build stone or rail fences. Butchering day was a busy time, when several pigs and some cattle were dressed in one day. Among the women, there were paring bees, preserving bees, quilting bees and spinning and weaving bees. Dried corn and pumpkin were important sources of pioneer food . . . so the corn husking bee and the pumpkin bee were favorites with young and old. In addition to the bees which had work as their main purpose, there were "house warmings", spelling bees, maple sugar eating bees and other occasions when no work was done. Except among families who disapproved of dancing and music, the invariable end of every bee was a dance in the house or

the barn. In the pioneer period, the bee lightened the burdens of severe and unremitting toil, of privations and hardships by providing sociality and diversion that was as necessary to the life of the people as the work accomplished.

Acceptable Worship

Within the life of the Christian Church there are a great ship services. We have every- is a tendancy to imagine that we thing from the ultra simplicity are doing God a favour by attenof the Quaker meeting house to ding Church and taking part in the elaborate liturgy of the Ro- the life of the Church. Our serman Catholic or Greek Orthodox vices are quite often judged suc-Churches. There seems to be no cessful if there is a good congreuniformity and no possibility of gation and a well filled offering overcoming this problem.

This naturally leads us to ask "Is there any acceptable way to worship God, or is one man's method just as good as the next?' Perhaps the story of Cain and Abel will provide us with some

on our trust in Him as one who The writer of the Book of Hebrews in his great chapter on the heroes of the Faith (chapter II) tells us that "Abel offered unto God a more acceptable sacrifice than Cain's." What did Abel offer to God? He presented in sacrifice an animal which had ple trust in God as the One who been chosen from his flocks. The animal was killed and offered up penitent sinner is the first and upon an altar, being fully con- most fundamental requirement sumed by fire. It was a complete sacrifice, and in this act of worship, Abel believed that God fully atoned for his sin and accepted him as a just man. On the other hand, Cain, we are told, offered to God the fruit and vegetables he had produced on his land. But we read that these were unacceptable. Why? Because they did not speak adequately of his need to be reconcilled to God because of his sin. Cain offered the work of his own hands, instead of a

heart full of faith. This then is the basis of true worship as far as the Bible is concerned. Our acts of devotion are only acceptable to God when they are permeated by a sense of our great need for forgiveness and cleansing, which can only be given to us by the mercy of God. We cannot win or earn God's forgiveness. All we can do is accept it. God is pleased to accept us when there is a due regard for the serious nature of our sin, and our willingness to be restored to fellowship with Him. This is seen fully in the cross of Christ, there our Lord took sin seriously, and offered Himself as a sacrifice for the sin of all men. Those who come to God, not trusting in their own god works, as Cain did, but in Christ and His finished work, can be assured that they are accepted to God.

This is a fact that must be em-
