A new style in telephones for the home will be Maple at 9.45 a.m. in the middle the car went into an alleged making its appearance here on Monday, December 5, according to Mr. W. C. Barnes, Bell manager for this

Known as "The Princess", the compact, ovalshaped phone reduces by more than a third the space needed for current desk-type telephones. A product of five years of research effort, it has been described as "light and elegant, with a classic simplicity that stems from a purity and precision of form."

Created for use in any room in the home, the new space-saving telephone will be available in five different colors - white, beige, pink, blue and turquoise. The latter shade is the newest of the many colors introduced recently by the company.

The new telephone is equipped with a dial light that glows at the flick of a switch, and shines more brightly when the receiver is lifted.

The Princess is designed to take up a minimum of table or counter space in the many areas of the home

where compact supplementary phones are needed.
