(CONTINUED FROM PAGE 1)

in these areas have great difficulty obtaining accommodation. For equal, outsiders the difficulty is much greater and could become almost impossible.

stages can be cured. Without adequate hospital and laboratories of the people of the County as a whole. the chance and hope of help is denied and unnecessary deaths recorded. This could happen to any one of us as matters stand.

(4) In the event of a disaster with resultant injury to many, or an epidemic, the people of this County today would be without and furnishings, the money required is estimated to be four million even a hope of hospital care and many would die due to inadequacy three hundred and fifty thousand dollars (\$4,350,000.00). This to be of accommodation. (Vide - account of catastrophe Windsor 1960). (5) Anyone can confirm the desperate position of the people Federal & Provincial Government Hospital

of the County as to hospitals - "Ask Your Doctor!!!" (6) Part of the capital required to build and equip and furnish (About 1/3 of the cost and based on the number hospitals is obtained by grants from the Federal and Provincial Governments figured on a basis of number of beds and services; From County debenture borrowing, approx.: .....

this amounts to approximately 1/3 of the total capital cost. The (About 3/3 of total cost) remaining % must be obtained locally. (7) The operating and maintenance cost of hospitals is paid by

equals roughly the total capital cost of building and equipping ties. a hospital.)

(8) The cost of operating and maintaining a 100-bed hospital salaries and wages, and to a large extent is spent locally.

Hospital Commission from monies received from:

Hospital Insurance Premiums -approximately 48% 41% Federal Government Ontario Government General Revenue

(9) York County at the present time is short over 400 beds these beds are being found in the neighbouring municipalities. This means that some \$4,000,000.00 per year of the premiums collected from the people of the County is being spent every year outside the County.

(10) Investment of a comparatively small amount of capital by the County can provide, 1st: safety, and decent attention for those giving birth and to those requiring hospital services, and 2nd: will provide institutions that will keep the spending of the people's premium money within the County. If nothing is done before 1971 to improve the County situation, and the neighbours have the beds available, as much as \$7,000,000.00 of our money would be spent annually outside of the County for hospital services for our people.

(11) Time is of the essence. To prepare and obtain approval of preliminary sketches, takes from three to four months' time. To prepare sketches, plans, detailed working drawings, prepare for and receive tenders, takes about eleven months. With about twenty months to build, there is a lapse of 31 months or two and one half years from the time of the go-ahead to the completion of the first stage.

(12) The proportion of capital grants by the senior governments may be increased but due to the critical conditions which exist, a start must be made now on the basis of the present grants. (Any increase in grants up to the time of completion of the project will apply to the benefit of the project.) At the same time action must be taken jointly with other counties and municipalities to have the government grants increased and to investigate the possibility of special taxes to raise funds for hospitals, such as taxes on business, gasoline, amusements, liquor, meals over a certain price, etc. People are prone to say "They should pay".

In Stage I of the hospital plan for the County conditions as they are now must be taken into account. Changes take time, building takes time; in the present emergency there is no time to spare.

(13) Capital to build hospitals has been on a hit-or-miss basis. Though government hospital construction grants are made on definite basis laid down by Acts of Parliament and amount to approximately one third of the capital cost, the remaining twothirds has been obtained by divers methods, partly from local government (as it sees fit), and from bequests, religious organizations, charity and charity drives. The matter of financing hospitals should be placed in a rightful position within municipalities, placed on a financing footing comparable with schools roads, sidewalks, buildings and sewage disposal plants, and etc. Then the two-thirds of the capital costs of hospitals would be obtained from County debentures. The amortizing of these debentures would come from the hospitals' fair share of the budgeted income obtained by levy on the constituent municipalities. There need then be no increase in taxes if other requirements are scaled relatively and realistically. Disease and sickness cannot be legislated against, but provisions for care of the unfortunate sufferers can be legislated for by the provision of proper and adequate hospitals.

(14) Sewers, sidewalks, roads, public buildings and bridges, built with money raised from grants and County money, earn nothing and return nothing in money to the people of the County. Hospitals on the other hand, operate on the insurance premium

money raised, sent out, returned and spent in the County. Hospitals, in their spending, compare with the largest industrial

plants. Sewers, sidewalks, etc. may be considered necessary but hos-

pitals are vital and essential, and there is no substitute in the existence of a community.

Having considered the above factors and as a result of investigations and deliberations, the Commission finds that the Joint Report submitted to Council and now tabled is a good report. It is conservative in its recommendations to meet the overall needs of the degree of safety for himself and his family for the price of 1 bottle of the Week with a triple of 828. County up to 1971. The Commission has accepted the report and recommends that County Council should accept the "Joint Report" as containing a sound appreciation of the hospital situation and presents a most reasonable solution of the problems if carried out in sensible and practical stages.

The object to be attained by 1971 for additional hospital facilities within the County of York contained in the Joint Report is briefly as follows:

1. That the "County Hospital Service Area" be the area contained within the boundaries of the County of York, to include all

municipalities. 2. That York County Hospital at Newmarket be extended to

better serve the Northern portion of the County. at Richmond Hill to serve the Southern portion of the County.

4. That the York County hospital at Newmarket be brought by of your constituents. stages by 1971 from its present 113 active treatment beds to 320 Recommendations: active treatment plus 60 chronically ill beds or to a total of 380 beds of all types.

5. That a hospital be built in stages at Richmond Hill to have within the County of York." a capacity by 1971 of 280 active treatment beds plus 40 chronically ill beds or a total of 320 beds of all types.

6. The County of York would then by stages by 1971 be provided sketches. with hospital accommodation and services within its boundaries as follows:

At Newmarket by 1971 -

Active Treatment Beds 320 Chronically Ill Beds 60 All Beds 380 At Richmond Hill by 1971 -

Within the County by 1971 -Active Treatment Beds 600 Chronically Ill Beds 100 All Beds 700 FOUR MILLION THREE HUNDRED AND FIFTY THOUSAND with 82 points.

It is not feasible to bring this about all at once no matter how DOLLARS (\$4,350,000.00). great the urgency.

mond Hill be built to provide a total of 325 active treatment beds of our people of York County. within the County now. This step towards the fulfillment of the Rec-

ommendation contained in the Joint Report to be known as Stage I. It is estimated in carrying out the ultimate plan that the cost of

WITHOUT OBLIGATION

We will temporarily install in your main water system a GAUTH WATER SOFTENER in your home (you pay nothing on delivery) TO LET YOU TRY washing your hair without shampoo, use two-thirds less soap for laundry, dishes and bath, etc. Shave with ordinary soap instead of your present shaving lather. Make better tea or coffee by using less, and

use less sugar. Wash your car with soft water. After taking our free home trial, if, for any reason, you are not completely satisfied and convinced of the saving you will have in years to come on soaps, clothes, plumbing, etc., we will remove softener, replace your line and guarantee it will not cost you a penny.
