TREES ARE OUR BUSINESS Free Estimates

Free Advice

Pre-Christmas Message There are many ways to get your name in

the news, but the way not to do it is through thoughtlessness or carelessness and end up a fire casualty. Now that the winter season has arrived, it

is just plain common sense we should be more alert to the dangers of fires. The heating equipment in all buildings should be checked and cleaned - not only will it be safer

but more economical. With Christmas just a few short weeks away

and preparations for the decorating of stores and homes taking place, just remember that hot electric bulbs against dry Christmas tree branches can very easily cause a fire. If Christmas trees are to be erected, keep

them away from doorways, supplied with plenty of water, and turn the lights off when leaving the building or going to bed. Put the tree out of the house as soon as

possible after Christmas. Too many Merry Christmases are turned into

tragedies through Christmas tree fires.

Wishing Everyone A Fire Free Christmas
