LAWN TIME!

Dear Friends:

The starting of a lawn is very important, the real secret is the after care. We may use the very best Seed or Sod to establish a lawn, but without reasonable after care, any good lawn will peter out. Grass, like any growing thing, needs nourishment.

The following is a programme that we use in the Spring for maintaining a good lawn.

Roll lawn once each way, not too heavy a roller. This will press roots that have been pushed to the surface by the winter frost back into the soil.

Fertilize as soon as possible as the Spring Rains will wash the fertilizer down into the roots where it will do the most good. A balanced fertilizer such as So-Green (7-7-7) developed by lawn care specialists - to produce thicker, greener grass and healthier root systems. Recommended for - Lawns, Golf Greens and Fairways, Trees, Shrubs, Flowers and Gardens.

Top-dress lawn with a Black Sandy Loam by placing small piles all over the lawn and turning the rake over and drawing the loam towards you. The loam will fall into the low spots. Cover lawn to a depth of 1/4 inch to 1/2 inch.

If your lawn is thin, we suggest that you sow our special Seed Mix that we recommend for overseeding at a rate of One Pound per Four Hundred Square Feet.

This spring we are pleased to announce our COMPLETE LAWN and GARDEN MAINTENANCE DEPARTMENT. This service can be arranged on a monthly contract basis from spring clean-up through until fall.

May we also remind you that it is NOT TOO LATE to have your lawn mowers sharpened and serviced ready for the spring. Our COMPLETE MOWER REPAIR SERVICE is located at our DON MILLS YARD, so for our pick-up and delivery service just phone AX. 3-8286, or leave a message at our store.

Trusting the above suggestions will result in a deep green, healthy lawn that will stay that way all Summer, I remain,

Sincerely yours,
F. V. Watts.
