Fire Destroys 5 Acres Of Vivian County Forest

Dry warm windy weather continued during the past week and fire danger ratings, throughout the Lake Simcoe district, were generally high by the week-end.

Three fires caused some concern in the south part of the district and could have reached serious proportions had not prompt action been taken. The most serious was a fire which broke out at 4:00 p.m. on the afternoon of April 24th in the south tract of York County Forest, Concession 7, Whitchurch Township. The blaze very quickly raced through five acres of a 13 year old white and red pine plantation, which was destroyed. Department staff at Vivian brought the fire under control with power equipment and a slip-on tanker, with assistance from fire brigades from Mount Albert, Stouffville and Aurora. Forty extra fire fighters were also recruited from residents in the local area. Fire crews had the blaze under control by 7:00 p.m. and continued mop-up during the night with the fire reported dead out by 10:00 a.m. the following morning.

The quick effective action taken, undoubtedly, saved much more serious losses. Approximately 250 acres of county forest and several hundred acres of private land, tree plantations and several homes were threatened.

Cause of the fire was not immediately known and is being investigated.

On the same day, April 24th, a small fire broke out on the road allowance bordering the west tract of York County forest burning one-quarter acre along the road allowance. The fire was prevented from burning into the forest property by a fire guard along the road allowance. Local residents were able to get the blaze under control quickly and department staff from Vivian patrolled the area until dead.

Ten acres of dry grass land in the Metro Toronto and Region Conservation Authority Forest, in the Albion area, was burned over on April 23rd. The outbreak resulted from a resident's rubbish fire getting out of control. Flares were quickly uphilled in the dry grass jumping the township road into the Agreement Forest property. Action was taken to extinguish the fire by the Albion Township Fire Brigade from Palgrave.

The property was scheduled for tree planting in this spring's operations but fortunately no trees had yet been set out at the time the outbreak occurred.

Frank Watts Says . . .

LAWNS ARE OUR BUSINESS!

As our business is lawns, right from the growing of Sod on our farms to laying new lawns, we are constantly trying new fertilizers, seed, insecticides, fungicides, weed killers, etc. In doing this, we have been able to pass on to our customers the best products on the market to date. The following are items that we have used in producing and maintaining with very good success.

"How To Have A Beautiful Lawn With Sod" by Frank Watts. Clear instruction for laying and maintaining a sodded lawn. Phone or write for your FREE COPY of this interesting pamphlet.

Frank Watts' Merion Blue Sod
Grown at our farms from No. 1 Merion Seed (pro Pratenus). This is without a doubt Ontario's most beautiful sod, loves sunny areas, not recommended for shady property. Requires a fertilizer high in Nitrogen. Merion has a very wide blade, hence a very dense turf, that is so strong due to the deep root growth that weeds are no longer a lawn problem. Merion Blue should not be mown less than one inch at anytime. Does not require watering as much as other grasses.

Frank Watts' Kentucky Blue Sod
This is Canada's natural grass and does well in reasonable shaded areas, produces a beautiful lawn with very little care. Can be mowed as low as half an inch, Spring or Fall, one inch in Summer. Requires a balanced fertilizer (7-7-7).

CULTIVATED FIELD SOD
We obtain this from select farms (not necessarily our own). The farmer originally sows his own seed mix for pasture for his cattle during the Summer. The better the seed the better the feed. The cattle in turn toughen and fertilize the grass for years and years and for this reason we recommend it for toughness. Ideal for playgrounds, backyards and large areas that are not expected to be show places. This is much cheaper than Kentucky or Merion and does produce a fairly good lawn, in fact ninety per cent of the lawns in Toronto are from pasture sod. Maintenance is the secret of obtaining a good lawn from pasture field sod.
