# Year In Ceylon Enriches Knowledge Of Grethe Dahl

BY MARGARET I. McLEAN

While many of us use reading as a substitute for travel, it was a high school study of the work of Joseph Conrad that made one Richmond Hill High School student decide to one day visit Bankok and other exotic cities of the Far East. It was only after three years spent training as a nurse at the Toronto General Hospital and a further year at the diploma course in public health at the University of Toronto that Grethe Dahl, of 35 Richmond St., Richmond Hill, was able to combine this desire with her chosen work. In the early fall of 1961, with 15 other graduates of the University of Toronto she left Canada for a year in Ceylon.

The students were the first ally learned to speak Singhalese. contingent of the Canadian Pre-natal clinics and well-Overseas Volunteers, a group baby clinics were held regularorganized not to provide for- ly, although the latter were ofeign aid but to promote under- ten just free milk distribution standing among the peoples of centres. Powdered milk from east and west. This could best CARE and other organizations be done, they felt, by living in was distributed to mothers of the east for at least a year, not small babies, although at the as a tourist or missionary, but end of each month, stocks usas one of the native people, in ually ran out. Powdered milk native homes, eating their food was also distributed to the and having exactly the same schools and here the nurse had standard of living as those a- to check on the preparation mong whom they were work- and distribution of the milk ing. Miss Dahl found this idea The schools, although numerextremely hard to get across to ous (the country is 80% literofficials of the Rural Develop- ate) were very poor, often only ment Department in Colombo, a bare room with benches, and the capital of Ceylon, to whom very crowded. So Enriched flour was also donaccustomed are these people to ated for school children. This

here it was difficult for Miss each school child received one wanted to work on the same basis as the rest of the public health nurses. It took her several months to be accepted as a useful person with a contribution to make.

Eventually, however, Grethe found herself engaged in much the same routines as are followed by our local York County Health Unit.

The Unit took care of an ar- of the low protein diet and ea of approximately 30 square miles, part urban and part rural and was covered by twelve nurses and the same number of public health inspectors. Many of the staff spoke English and records were kept in English but, to communicate with the patients, Miss Dahl gradu-

Long Journey Home Miss Dahl began her long journey home in August of last year, finally reaching Richmond Hill in the middle of December. Travelling with another nurse from Alberta, she went first to India where they met with the newest group of volunteers who were being given orientation lectures. From there the two girls travelled to the Punjab, visited Tibetan refugee camps, went to Benares and spent a week in Calcutta. All these trips were taken very cheaply, travelling third class on the trains - an almost unheard of thing for white people to do. Next the girls flew to Burma and spent a week in Rangoon, staying at the local
