ESTIMATED COST TO OPENING AND RECEIPT OF FIRST OPERATING MONIES FROM ONTARIO HOSPITAL SERVICES COMMISSION

Land Cost	SOURCE OF FUNDS
Construction	County of York
(Less Tax) \$2,080,000	Grant \$1,180,000
Architects' fees	Federal Grant
\$ 145,000	\$ 352,000
Furnishings and	Provincial Grant
Equipment \$ 328,000	Bank Borrowing
	\$ 291,000
Pre-opening	
Expense \$ 46,000	Anticipated Result
Opening Inventories \$ 35,000	of One Half of United
Working Capital	Hospital Appeal
\$ 50,000	\$ 500,000
\$2,752,000	\$2,752,000

THE DRIVE

From these figures it will be seen that about one third of the capital cost of land, building equipment and furnishing of our hospital is provided by the federal and provincial governments. The remaining two thirds must be found locally. The large portion of this has come from the most generous grant of \$1,180,000 by the County of York. This money is derived from county debentures supported and amortized by annual levy, based on an equalized assessment, on the fourteen constituent municipalities of the county.

It was assumed that \$500,000.00 could be raised by donations and subscriptions the result of a fund raising drive.

Taking into account the sums that could be raised from these four sources together with safe and well secured bank borrowing, to provide for inventory, pre-opening expenses and working capital, an amount was arrived at which could be spent to provide the greatest number of beds and facilities at this stage for the active treatment care of the people of the area.

A monthly budget was drawn up, to be carefully revised every three months, covering every item of income and expense that could be forecast.

I am happy to say that this budget has been reasonably accurate, sound, closely watched and adhered to.

THE COUNTY OF YORK UNITED HOSPITAL APPEAL

Probably the most important move in the development of our hospital project was the getting together with the County of York Hospital Association at Newmarket and designating the area of the County of York the joint hospital service area.

This joining together made the concerted approach to

County Council most rewarding. It brought about the formation of the York County Hospital Commission for the co-ordinating of all hospital services, active treatment, chronic and convalescent care within the county. It also brought about a joint effort in the public appeal for funds by donation and subscription.

A joint steering committee was established consisting of members of both hospital boards.

The steering committee with the help of the "Community Relations Consultants" headed by Mr. E. Antognini established the principals of the drive.

We were most fortunate in Mr. Ray Marshall's gracious acceptance of the very great responsibility as chairman of the campaign.

Mr. Marshall enlisted the services of patrons, chairmen of the various committees and members of the team.

The drive was under way and the results to date are as follows:

Advance Canvass	\$202,815.00
National Corporations	\$327,050.00
County Corporations	\$111,825.00
Service Clubs	\$ 92,474.50
Doctors	\$ 95,050.00
Foundations	\$ 2,200.00
Employees	\$ 36,702.63
General Gifts	\$ 14,790.57
Community Campaign	\$183,529.30
	\$1,066,654.60

The campaign is continuing and for a very good reason. In establishing the plans for our hospital certain items were left out in order that the maximum number of beds could be provided at this stage. These items can be conveniently added as money becomes available.

The number of beds in the county with a population of 112,000 stands now at 113 - this is one bed per thousand. On completion of the extension of the hospital at Newmarket and the new hospital at Richmond Hill there will be a total of 389 beds or 3.4 beds per thousand. The safe minimum is 5.5 beds per thousand. Taking into account the increase in population plus the summer influx of people in the holiday area the two projects now under way will provide about half the required number of beds.

Thus there is need for every dollar that can be found to provide active treatment beds and facilities so urgently required.

The executive committee of the united hospital appeal has now handed back to the two boards the responsibility for the

continuance of the appeal - the administration, operation, handling and distribution of funds and the maintenance of public relations. There is a great debt of gratitude due to all those who have worked, and are continuing to work on this project, those who have donated and have pledged further donations. There is a great reward in the satisfaction that their sweat will be the saving of the blood and tears of those who will suffer from accident and disease.

Steps are being taken to set up a County of York United Hospitals Trust Committee with representatives of both boards and a chairman mutually agreed upon. Adequate terms of reference to meet present and possible changing conditions will be established.

The division of costs and distribution of proceeds are equally divided between the two Hospital Associations and will remain so until such time that some variation is advisable.

The York Central Hospital Auxiliary, with its President Ruth Miller, a wonderful executive and a fine membership is an organization firmly established. This most active association is doing wonderful work in this preliminary period and is preparing to render a great service when our hospital will be opened. The enthusiasm of all its members is an inspiration greater than could ever have been anticipated. Our great thanks is due them.

Your board of trustees has served you well. The attendance at meetings has been very good. Every trustee has given of his time and talent in the forwarding of your interest and has been most conscientious in the application of public funds.

I have no right to say this but I hope that the members will see their way clear to re-electing your present board for another term of at least one year in order that they might have the honour of serving you at the opening of the hospital. Be that as it may.

The medical advisory committee and their consultants, the profession as a whole, deserve our thanks.

The Ontario Hospital Services Commission, the Ontario Hospital Association and the Ontario Municipal Board have given us the greatest help and wonderful advice in all our negotiations.

County council, the Councils of Richmond Hill, the Townships of Vaughan and Markham have co-operated to the fullest extent.

You can see on the Maple Side Road evidence that you will have your hospital on one of the finest sites on this continent well and truly established in which you can be justly proud.

Respectfully submitted
D. H. Storms, President
The York Central Hospital Association.

at the office during last year was 619.

Highway Traffic Act prosecutions totalled 712. There were 275 for speeding, 151 for defective lights, 26 for careless driving, 11 for excessive noise.

Receipts by the department during 1962 totalled \$8,924.50 including \$2,444 for dog licences, 1723 tags sold, taxi licence \$131, bicycle licences \$87, parking tags \$854, transient traders \$2,500.

Receipts from parking meters on Yonge Street amounted to \$1,829.75 for the year.

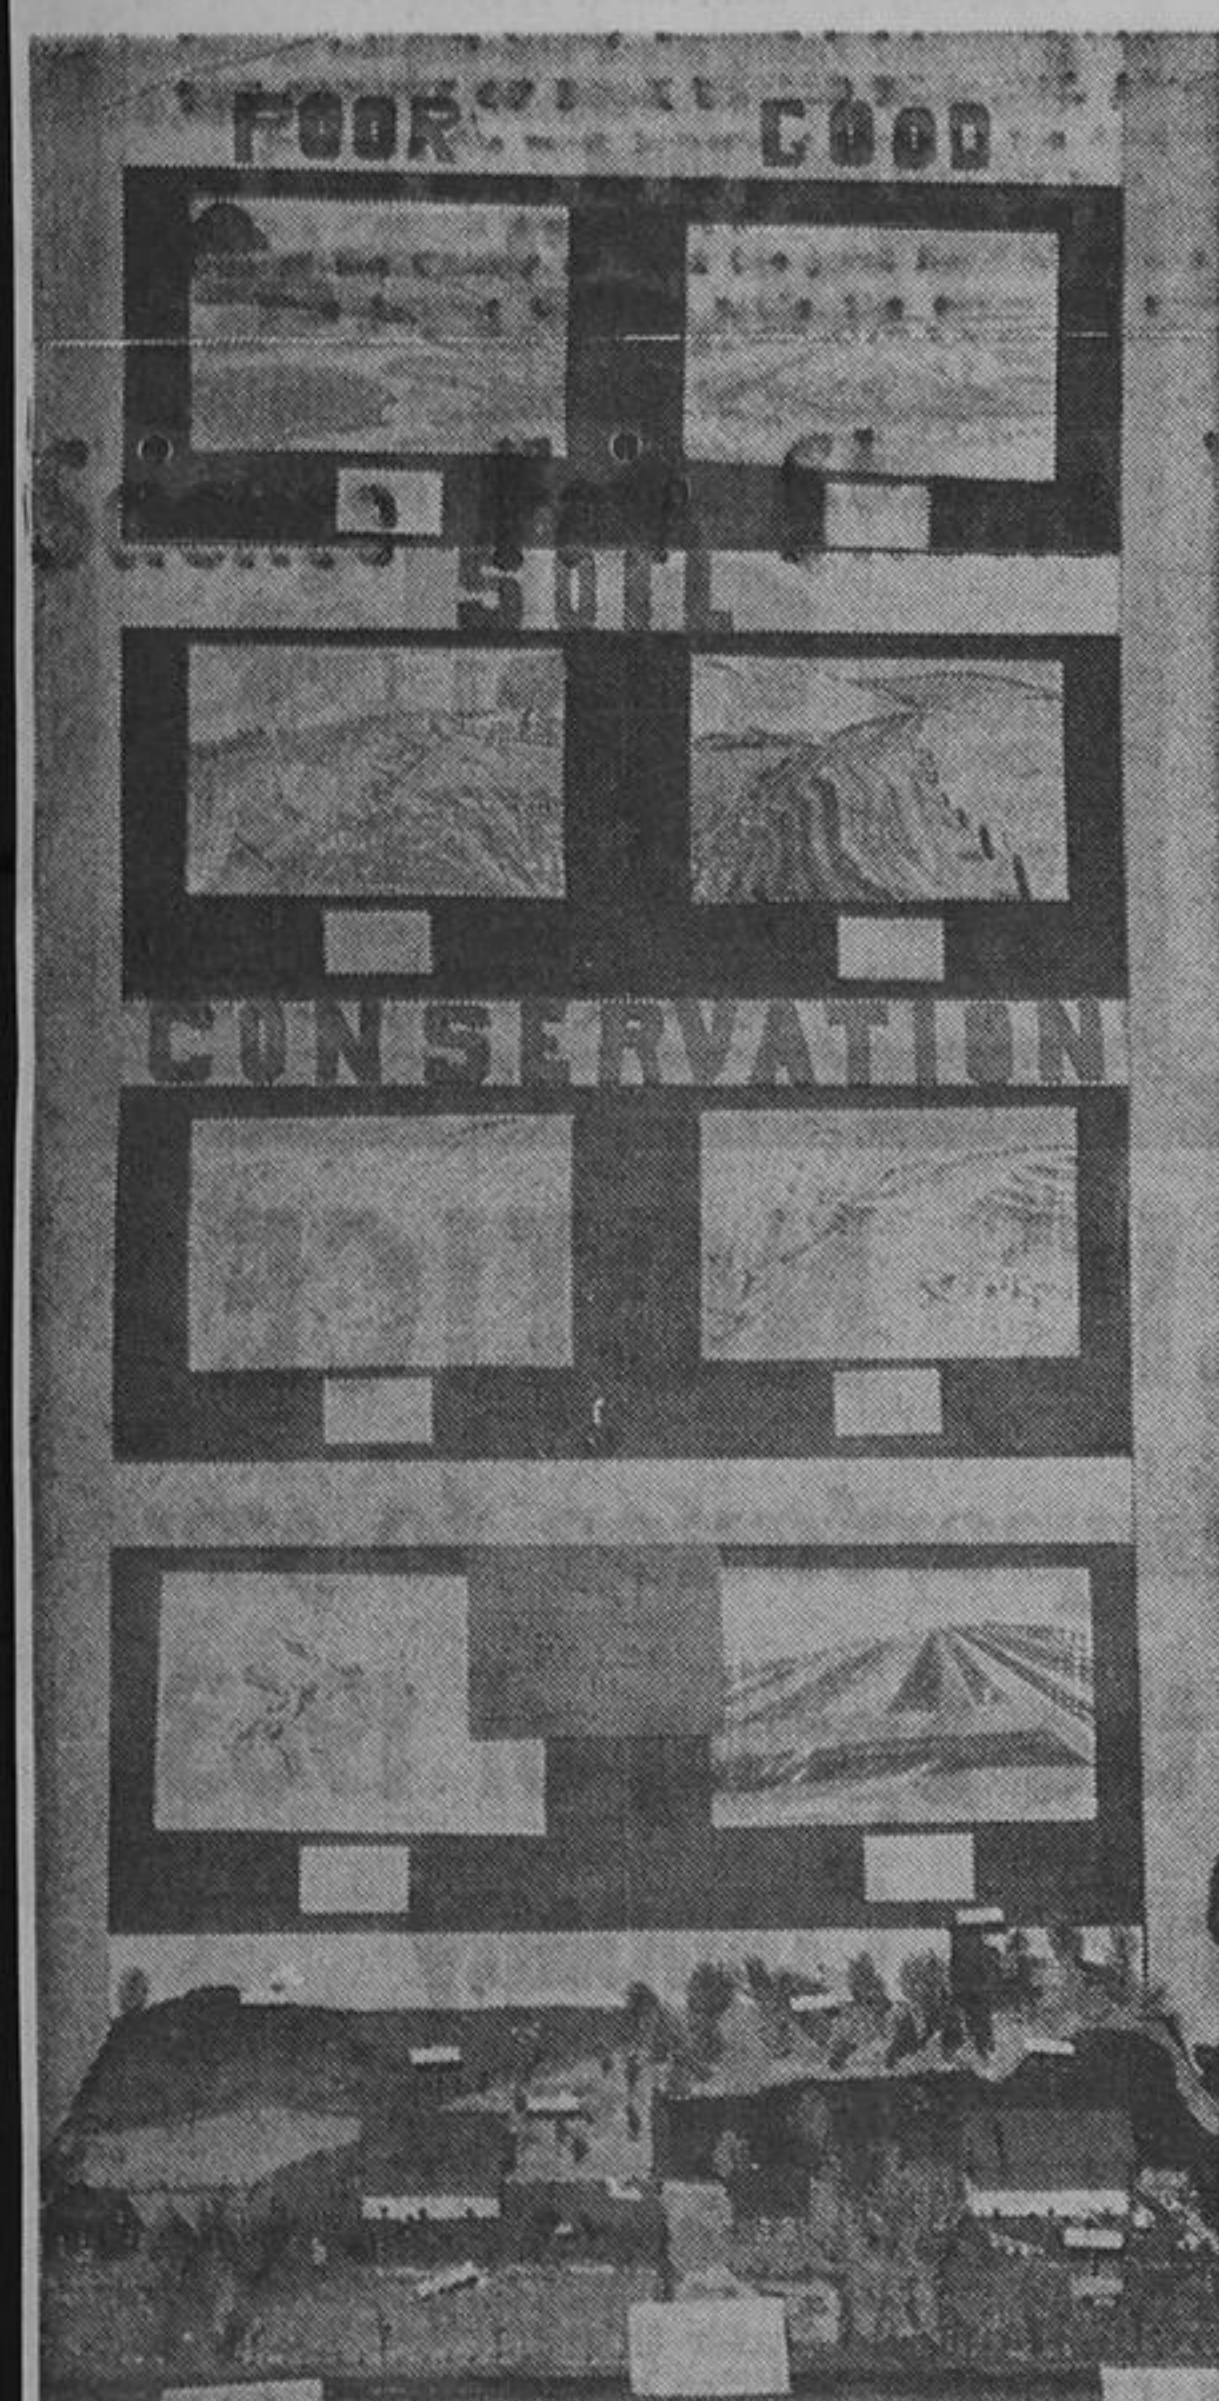

Receipts from fines levied in Magistrate's Court during 1962 amounted to \$9,990, the major amount \$6,610 being for infractions of the Highway Traffic Act.

The members of the 1963 police committee of town council are Councillor Murphy, chairman; Deputy-reeve Stanley Tinker and Councillor Walter Scudds.

In commenting on the annual report Deputy-reeve Tinker suggested that citizens interested in details of the report could have a copy by applying to the chief of police.

Science Fair Shows Varied Talents Of School Pupils

indicating various types of weather fronts, warm, stationary, cold and occluded. This exhibit was the work of Robert Raeburn, Michael Sergovitch, Wayne Leach, Lynn Bevan, John McNeil, Roderick Hogg, Pamela Berton, Heather Reid and Keith Burbidge.

First prize for an individual project went to Alan King of Charles Howett Public School for his demonstration of the operation of a two transistor radio. The component parts were separated and labelled but joined by wire and the whole was operable.

Second prize in this group was awarded to Michael Carter for his exhibit showing the stages of development of a chick, combining drawings, photographs and preserved specimens. The chickens progress was shown from the early embryonic stages to a series of excellent photographs of a mother hen with her chicks.

Striking Exhibit
One of the most striking exhibits in the entire show was an entry by the grade 8 class of Powell Road School. Illustrating the formation of 19 constellations it consisted of a large black circle of board, about a yard in diameter, studded with pieces of plastic rods of various diameters arranged in the pattern of the constellations. Each constellation could be lit up individually by moving a labelled switch. The 19 switches had all been carefully cut from galvanized metal and each had been

wired to a light bulb behind each separate constellation, the light from which shone through the small sections of plastic rod. These youngsters spent every recess and every day after school until 5 o'clock for more than a month preparing this ambitious project.

Another interesting group project was from a group of grade 8 students at Thornhill school who had made a neat model of an aerial view of a town, bridge, etc. illustrating how a river forms a delta.

Linda Graham, Myra Bloom and Lynda LaRiviere, all grade 8 students at George Bailey School had a colorful display of a miniature bird station. It included painted relief models of six different types of birds, bird house, feeding station, etc.

Cattle and their products was the subject of the exhibit entered by the grade 7 and 8 class of Jefferson school. It included posters illustrating the various types of cattle, and containers of such dairy products as milk, butter, cheese, ice cream, powdered milk, etc. as well as examples of leather items made from cattle hides.

Good Farming Practice
Although they were not technically allowed to enter the fair, the Burlington rural school showed a project that was the joint work of grades 6 and under. This was a most ambitious model depicting good and poor conservation practices by means of two model farms side by side, the one illustrating reforestation, selective cutting of woodlot, a shelter-belt, farm pond, etc. The other farm illustrated what happens when none of these good practices are followed. This was certainly an

appropriate and potentially useful piece of work for rural children.

Interesting individual projects were entered by William Jay of Langstaff school, illustrating five different types of birds and their unique nests; a map of the constellations plotted out with brilliant by Val-erie Simmons; an oscilloscope illustrating sound vibrations by Stephen Shore of George Bailey School; a cross section of the interior of a volcano, painted on glass and neatly framed by Vernon Walters of Charles Howett School; a unique representation of 10 of the brightest stars of the solar system illustrated by means of clay models suspended on wire circles, by Gail Halgren of Jefferson school; a working model illustrating the use of electro-magnets in a transmission station, galvanizer, buzzer, etc., by Richard Magee of Thornhill school; the construction and operation of a midge Van de Graff static electricity generator by Robert Reaman of Concord school.

There were also leaf and mineral collections, a display of various types of crystal formations, stages in the growth and manufacture of cotton, a crystal radio set, and numerous other exhibits. The majority of the projects illustrated some facet of the grade 7 and 8 science course while others reflected the interests of individual students.

The fair, as a whole was certainly impressive. The interest shown by these students reflects the stimulation they have received from their teachers and from the course of study. The winning entries will be sent to the York County Offices at Newmarket where they will be judged in comparison with prize winners from other areas on April 6th.

This impressive project on Soil Conservation won first prize for Kleinburg Public School in the group entries.

The Vaughan Township school area semi-finals of the York County Science Fair were

NEWMARKET : Davis Drive, from highway 9 near Schomberg to Yonge Street at Newmarket, will be designated a "development road" and will undergo a rebuilding by the Ontario department of highways, county council has been informed.

Action That Won Hornets Place In OMHA Finals

An action-packed moment in the game that saw the Richmond Hill Hornets trounce the R.C.A.F. Trenton team 6-4 to win their way into the O.M.H.A. finals. Next to meet the victorious Hornets will be winners of the Leamington-Ingersoll series. In their hard-fought contest with the Trenton R.C.A.F. team the Hornets lost the first game to their opponents on their home ice in Richmond Hill, evened the score up with a win when they played the R.C.A.F. team in Trenton and then came through to win the best of three series on their own ice in Richmond Hill last Sunday.
