Enjoy Ski Trip To Europe Perhaps the most interesting trip taken by a Thornhill resident this winter was that taken by Mr. David McLean of Thornbank Road. Along with a group of some 120 members of the Toronto Ski Club, among whom was another Thornhill resident, Bob MacIntosh of Oakbank Road, Mr. Mc-Lean flew to Austria and Switzerland

on a ski-ing holiday. The group spent nine days at Kitzbuhel, a ski resort area in Austria and Mr. McLean reports that he was on skis every day during this time. As ski-ing in these mountains can be dangerous because of avalanches and also because it is easy to get lost, the skiers went out each day with a guide and instructor, with about eight or so skiers to each guide. Although he has been ski-ing for thirty years, Mr.

McLean states that he profited a great deal from the instruction he was given by the guides.

Next the group went to Davos Platz in Switzerland, said to have the longest ski run in the world, 14 miles-Mr. McLean took even this in his stride and claims to be ski-ing better now than he ever has - which I can well believe. (Too bad they were there so early though, I noticed a picture of Princess Margaret taken at Davos last

Mr. McLean was most impressed by the height of the mountains and the length of the ski runs. The snow was excellent, he found, although very deep. The party soon found that if they accidentally lost their skis, they were promptly floundering in snow up to

their hips. They found it not too cold ski-ing in the mountains, with little wind. When on the sunny side of the mountain it was quite warm - hats could be left off - but it would be noticeably colder in the shade.

After nine days at Davos - ski-ing every day - Mr. McLean flew to Baden-Baden in Germany where he stayed with friends. From there, he went to Paris and then picked up the rest of the tour members at London, flying home from there.

Mr. McLean enjoyed the ski-ing tremendously and is even more enthusiastic about this vigorous sport than ever. He has skied regularly at Collingwood all winter and hopes to go down to Vermont for more ski-ing at Easter.

In Politics:

I believe political decisions are among the most important we as individuals have to make to-day. The increasing complexity of our society has brought new problems that demand new skills and positive solutions. As Canadians we each have an individual responsibility to participate in our political life; to ensure we have the best possible candidates: and to make our views known to the party of our choice.

Although we have a highly technical industrial complex in Canada, there is not now a single engineer in our parliament. As an engineer I believe I can play an effective role in government. I am prepared to spend my full time being your representative in Ottawa because I believe it is the most important responsibility I will ever undertake.
