For A Flameproof Tree
Some of my readers may be interested in a simple method of fireproofing a Christmas tree. The Metropolitan Toronto and Region Conservation Authority suggests the following ingredients which are used as a spray: 9 ounces borax, 4 ounces boric acid and 1 gallon of water. The spray should be applied thoroughly to the tree and to combustible ornaments.

Wealthy Santa Needed
The Metropolitan and Region Conservation Foundation is looking for a Santa Claus — one who could put \$225,000 in its Xmas stocking.

This is the amount required by the foundation to provide \$150,000 towards completion of Pioneer Village in time for Canada's Centennial celebrations in 1967, and to furnish \$75,000 for retirement of the existing capital debt on the Albion Hills Conservation School.
