How Fast is TOO FAST?

At Night the Critical Speed is 55 mph

A little known fact regarding the dangers of speed at night is illus-

trated in this chart. The Ontario Highway Traffic Act requires

that automobile headlights must reveal persons or vehicles at least

350' ahead. At 55 mph a motorist is travelling at a speed that

brings him dangerously close to being unable to avoid crashing

into a stalled vehicle or stationary object on the road ahead. At

60 mph it is doubtful that a driver could stop in time, and at 70

mph he is limited to two unattractive alternatives: crashing or
