

TSA 1 Markham Building 3 New Schools For Sept.

The Board of TSA 1 Markham is keeping a careful but apprehensive eye on school enrolment figures in its four schools as they continue their inexorable rise due to new residential development in the area.

Supervising Principal E. J. Sand reported at the March 14 meeting of the board that enrolment had gone up by 19 during February and that the board office has four or five enquiries each day about school accommodation from prospective home buyers in the area. He has been advising such people that wherever possible they should keep their children in their present schools for the balance of the school year.

Greatest increase has been at 16th Avenue School where 12 new students were admitted last month. The kindergarten is very crowded with 37 children in the morning and 30 in the afternoon. The board has engaged a teacher's aide and Mr. Sand reported that this is working out very well.

Enrolment at 16th Avenue now stands at 360; at Henderson Avenue 456; Bayview Glen 478 and Woodland 539. Four portables are in use at 16th Avenue and two at Bayview Glen.

Trustee Peter Rossi, chairman of the property committee, gave a progress report on the 12-room Baythorn School presently under construction and designed to serve the North Thornhill development. The building is now into the finishing stages with painters applying final coats to inside walls. Acoustic tile ceilings are being installed, electrical fixtures are in, plumbing is almost complete and classroom ventilators are being installed.

Baythorn School is being built by Elco Construction Company. Contract price was \$455,000, exclusive of furnishings. It is planned to open in September.

Also slated for September opening is the Woodland Senior Public School now under construction by Per-

win Construction Company. This school will include 14 classrooms, a double general purpose room and a library. Its total cost will be in the neighborhood of \$650,000.

However, the board has struck a snag in the third school which it requires for September. This is to be built on Royal Orchard Blvd. in the North Thornhill Development and will have 14 classrooms. Planned as a senior school and identical in design to Woodland Senior School, for the first year it will include kindergarten to grade 8 until other schools are built and fed into it. Department of Education approval for this school was received several weeks ago but approval has been held up from the OMB, without which contracts may not be let. Unless construction is started within the next few weeks, it is doubtful that the school will be ready for September occupancy.

To staff the three new schools, the board has advertised for 35 additional teachers. It is expected to have

93 classrooms in operation by September, compared to the 61 now operating. Fifteen teachers, all experienced, have already been engaged, including an art supervisor.

The board also plans to engage an itinerant remedial teacher to assist students who have been identified by the psychologist as of average learning ability but with some difficulty in learning.

Chairman of the Education Committee Louise Aime reported that at a recent meeting of principals an assessment was made of the psychological services to which the board subscribed last year, provided by the York South Regional Education Committee. The principals were all pleased with the results obtained and felt that there was good service and good follow-up.

As well as the psychological services, the board has agreed to subscribe to guidance services, beginning in September.

Education for the teaching of Oral French in grades 5 and 6. TSA 1 initiated Oral French in grades 7 and 8 five years ago, then extended it to grade 6 and two years ago began teaching it in grade 5 also. Three Oral French teachers will be required for next year.

Correspondence tabled at the meeting included a letter from the Canadian Education Association with reference to a two week course on educational leadership to be held at the University of Alberta's Banff School of Fine Art in May. Mr. Sand has accepted as one of the two appointees to the course of the Ontario Association of School Business Officials. The Board of TSA 1 will be financially responsible for his attendance.

It was also announced that the Ontario Institute for Studies in Education has accepted the board's application to have a teacher attend the summer science workshop. It has not yet been agreed who will attend. Fee for the course, including equipment, is \$800.
