SEPTEMBER 23, SATURDAY, 9.30 a.m. - 1 pm Richmond Hill United Church, Yonge and Centre Streets, UCW Rummage Sale. c1w9

Dr. F. W. Minkler, chairman of the Board of Governors of Seneca College of Applied Arts and Technology, folds a Centennial flag after unveiling a new symbol for the college. President W. T. Newnham (right) explains the symbolism of the design at a press reception held at North York Public Library.

The upward thrust of the arrow depicts technology. The "S" itself is a traditional link with the Senecas — a tribe of the six nations confederacy, native to this region. The trailing feathered end represents an artistic interpretation of the applied arts.

Seneca College Ready For Students

By MARGARET McLEAN
Three new classes were added last week and when it opens in September, Seneca College, York County's new College of Applied Arts and Technology expects to have 800 full time students, as well as close to 1,000 evening students.

This will make it the largest first year of a community college opened in Ontario, stated College President W. T. Newnham, B.A., M.Ed., at a recent press conference held at North York Public Library, Willowdale.

The college will open in a remodelled manufacturing building at 43 Sheppard Avenue East, immediately east of the Willowdale Shopping Centre at the southeast corner of Sheppard and Yonge Street.

The college has already purchased a 64 acre campus site at Finch and Woodbine Avenue (Don Valley Parkway) and expects an enrolment of 5,000 in five years, 12,500 in 10 years. "Where we will go from there, I don't know," said Mr. Newnham.

He emphasized that the college would be serving the community with full and part time day and evening professionally oriented courses which have been developed in close co-operation with business and industry. Courses are directly related to student interests and employment opportunities in the suburban Metro area. The largest number of students will be enrolled in business and data processing courses.

Division of the college is into general and applied arts, business, data processing, technological and technical.

GENERAL ARTS DIVISION
In the general and applied arts division courses will be available in early childhood education, for employment in nursery schools, day care centres, camps, etc.; educational technician to assist teachers with audio-visual equipment, libraries, etc., fashion, including marketing; general education, to upgrade adults with insufficient academic background to register in courses of their choice; municipal administration, a two year course leading to a probationary assessor's licence and work in urban, suburban, regional and county municipal offices; principles of law enforcement and crime detection, the only course of its kind being offered in Ontario and designed to upgrade law enforcement agencies; and social welfare, a course which will cover the social and environmental factors relating to the administration, organization or application of social welfare programs.

BUSINESS DIVISION
Two levels of courses will be available in the business division, three year diploma courses in business administration and secretarial science and two year diploma courses in general business and secretarial business.

The first year of business administration will include such things as accounting, advanced business mathematics, economics, organization and management. The second year explores the main functional areas of business and in the third the student may specialize in one of five areas, business computer systems, financial management, hotel, resort and restaurant administration, marketing and retail administration.

The secretarial science course is designed to train secretaries for highly placed executives

and includes a strong base of liberal disciplines, plus business subjects, office procedures and a high degree of stenographic skills.

The two year general business course provides an introduction to accounting, mathematics, economics and principles of business organization and management.

The secretarial business course is designed largely for adults who do not possess secretarial skills and would not fit into secondary school courses for this study. In the first year all students will be required to study business subjects related to the structure of organizations, management and methods. In the second year, secretarial skills will be specialized to serve the legal, medical and engineering professions. General education options, including English, receive considerable attention.

Special one year courses will be offered for competent high school business and commerce graduates who wish to specialize in legal or medical secretarial work.

DATA PROCESSING
The data processing division also includes two levels of courses, three year diploma courses in computer technology and two year courses in electronic data processing. Students will have access to a highly developed computer system. Graduates of the computer technology course will qualify for positions such as systems programmers or systems analysis while graduates of the electronic data processing course will qualify for positions as programmers.

Three and two year courses are also available in the technological division. A graduate of the three year program will have a sound knowledge of engineering principles and of sophisticated industrial techniques. He may become a professional engineer with further study. Subject to sufficient enrolment, technologies offered are to include biochemical, civil, chemical, electronic and mechanical technology.

Basic differences between this and the two year program is the amount of theory studied. Main emphasis of the two year program will be to develop the necessary proficiency in the manual duties required in modern industry and scientific establishments.

English will be a subject common to all courses with the latest and finest equipment used to make it a dynamic subject, such as large screen projection, closed circuit and public television, video tape recording, electronically equipped reading labs, AM-FM stereo radio and tape recording equipment. Thus English will be a multi-media course of studies with students exploring books, film, television, radio, advertising, newspapers and magazines.

EVENING PROGRAM
Extension program subjects available in the evenings will include a wide range in the business administration division, the data processing and general arts division. Included in this latter is a course in effective speed reading.

An effective reading laboratory is being set up under the direction of Dr. C. J. Wilkins and courses are offered to increase the individual's reading efficiency, comprehension and retention. Equipment will include the tachistoscope, the controlled reader and skimmer-scanner. These classes will mark the beginning of an ad-

Yonge Reconstruction On Schedule

(Continued from Page 1)
Downtown merchants have stated their opposition to a Yonge Street parking ban during and after its reconstruction.

Mayor Thomas Broadhurst at the time said there had been no final decision on a Yonge Street parking ban although it had been discussed in connection with the official plan.

He indicated some form of ban would likely be imposed during reconstruction because "we're going to try to keep two lanes going and it's obvious you can't permit parking in such circumstances."

Council later directed the transportation committee headed by Councillor Ivan Mansbridge to investigate off-street parking as well as meet with the merchants regarding the parking problem. Discussions are still being carried out regarding off-street parking.

The reconstruction report on Yonge estimates that the annual daily traffic on Yonge Street by 1985 will have increased to 32,000 vehicles for an 80 per cent jump over 1966.

Through trips will increase to 12,000 vehicles per day. The external trips vary from 8,000 per day south of the town limits to 4,000 trips north of the limits.

The engineering report stresses the proposed widening is necessary in order to just handle the present volume.

"Since the existing right-of-way is only 66 feet, eight traffic lanes cannot be provided. Additional right-of-way cannot be obtained without causing considerable damage to adjacent properties."

"Thus an additional four lanes paralleling Yonge must be provided to accommodate the anticipated volume within the next 20 years. If the population increases more than forecast, extra lanes will probably be required."

Touching on the hydro portion of the project the report recommended a partial overhead distribution system at a cost of \$140,000 as opposed to underground distribution at a cost of \$350,000.

"We believe that the high initial cost at \$350,000 for an underground system on Yonge Street for relatively low demand is not warranted and we do not recommend such a system."

York Central District High School Board
SCHOOL OPENING

GRADE 13 TEXTBOOKS: Grade 13 texts will be on sale at Thornhill Secondary School for students who register there. Grade 13 students who attend the other York Central schools may purchase their texts at Langstaff Secondary School on Wednesday, August 30th to Friday, September 1st inclusive from 9 a.m. to 4 p.m. No Grade 13 textbooks will be available through the schools after September 1st.

OPENING DAY — TUESDAY, SEPT. 5, 1967

On Opening Day, students are required at all secondary schools at 9:00 a.m. As this will be a FULL day students should plan to eat in the cafeteria which will be open, or to bring their lunches.

TRANSPORTATION: The Board's general policy is to provide transportation when the student lives two miles or farther from the school which he attends. Routes reflect not only this basic policy but also the need for some pupils to transfer from one bus to another.

Numbering of routes has been simplified. Where a bus does a second route for this board, the same route number will be used for the second run as for the first one. For example, L1 going to Woodbridge High School will be referred to as L1 on its run from Woodbridge High School to Thornhill Secondary School. (Last year the second route was shown as L7).

Langdon routes L1 to L6, starting at 7.40 a.m., will run as last year south on Hwy. 50 - 10th concession; Hwy. 27; Kleinburg - Woodbridge Rd.; 8th and 6th concessions to Woodbridge High School. L1, L2 and L6 will continue to Thornhill Secondary School. L3 will go on to Langstaff Secondary School, but not to Thornhill. (Thornhill pupils on or near Langstaff sideroad will ride L8 to Garden Ave. and take TTC to Thornhill). L4 and L5 will continue to Langstaff Secondary School.

L8 will pick up on the west side of Keele St. between Maple and Sherwood sideroad, go west to Jane, south to Hwy. 7, north on Keele St. to the Langstaff sideroad, and not to Carville Rd., arriving at Langstaff Secondary School via Hwy. 7. L11, 14 and 12 will run south on Dufferin, Keele and Jane to Maple, thence to Langstaff. L14 will not go on Keele south of Maple. Going east on Maple sideroad, it will turn south on Dufferin to Carville Rd. A new run, L21, will leave Maple at 8 a.m. going non-stop to Langstaff.

L11 will continue from the north entrance at Langstaff Secondary School to Bayview Secondary School. L21 will take Grade 9 pupils from the Thornhill Green area to Woodbridge High School.

MARKHAM TOWNSHIP: Morton's M1 (changed) going south from Victoria Square on Don Mills Rd., will proceed west on Steeles to Bayview, stopping on the entrance to German Mills Rd., Bayview Country Club and at Vallancliffe. (Pupils on John St. east of Bayview will walk to the Green Lane bus, M2). M3 (Bayview-Glen) as last year but due to more pupils, some will have to board M1 at Vallancliffe and Steeles at 7.55.

M2 and M4 same as last year.

M5 (changed). Will not run on Bayview north of Elgin Mills Rd. After arriving Bayview Secondary School, will make the runs to Langstaff and return to Bayview Secondary School formerly done by M8.

ALLAN C. PECK, Chairman. S. L. G. Chapman, Superintendent of Secondary Schools.
