

**New Regulations For Cab Owners, Drivers**

New regulations concerning cab owners and cab drivers' licences were passed by Richmond Hill Town Council at its December 4 meeting. The motions were presented by Chairman Lois Hancey and seconded by Councillor John MacDairmid of council's fire, ambulance and bylaws committee.

In the future the yearly renewal of taxi drivers' licences will be subject to the police chief's approval or if he believes a licence should be suspended he will consult with council.

The police chief will submit each year by February 15 his recommendations for renewal of taxicab owners' licences to the bylaws committee. The licence year for taxis will run from March 1 to the last day of February of the ensuing year.

Because cab owners experience difficulty in obtaining drivers and because sometimes as a month elapses from the time of application until Department of Transport approval is received, it was agreed that letters denoting temporary taxi drivers' licences be issued until such applications are processed and approved or disapproved by the bylaws committee. Such letters will be issued subject to the approval of the police chief and will be valid for one month only.

Four applicants were approved for cab drivers' licences: James Meadows, Matt Kinnari, P. E. Medland and D. Ross.

**New Style High School Arouses Much Interest In Academic Circles**

York Central District High School Board's new non-graded high school, Thornlea, which is to open next September has been causing considerable interest in academic circles.

At the Ontario Educational Research Council conference in Toronto last week, the committee of six teachers and the librarian who spent last summer planning the school's organization, explained the plan to an interested audience.

The school will operate on a credit system with 70 credits required for a grade 12 diploma and 90 for grade 13. As well, subjects will be taken in five levels or phases, the first elementary or remedial work, the fifth advanced study, much of it done independently. Students may take various subjects in different phases, according to their ability or achievement, instead of being locked in a uniform grade for all subjects.

Thornhill Secondary School Librarian Mrs. Audrey Taylor also explained that the school is to be library centred, with the library a complete resource centre. As well as a collection of 12,000 books — 3,000 of them novels — the centre will also include 450 record albums, 800 film strips, 10 cassette tape recorders for personal use, and slides, films and video tapes.

Thornlea Secondary School was also the subject of an article in the September issue of "The Bulletin", a publication of the Ontario Secondary School Teachers' Federation.

**Meter Reader Sprays Sprayed In Return With Dog Repellant**

It appears that we are in the opening stages of the war of the dog repellants.

Postmen and other door-to-door civil servants were issued with a spray can of dog repellent December 1. The next day, a meter reader in Sandwich West Township was himself sprayed with an aerosol bomb by an irate dog owner after he had used the repellent in the performance of his duty.

Although the Federal Post Office circulars described the repellent as harmless to animals, Tom Hughes, director of the Ontario Humane Society states that the main ingredient of the bomb is oleo resin which could raise blisters on the skin of an animal. He is also concerned that an animal might claw its eyes because of the spray and cause permanent damage.

No Richmond Hill postie has had to use the repellent yet, reports Postmaster E. T. Willis. The post office can refuse to deliver mail where a dangerous dog threatens a postman.
