A Job Well Done

It was in June 1966 that Richmond Hill's arena board approached council with a suggestion that a regulation-size arena could be erected beside the old arena at no cost to the taxpayer.

Friday evening that new arena will be officially opened.

Since the first hockey players and skaters stepped onto the ice January 6, the new ice surface and the one in the old arena have been in use every available minute, proving that the new facility was greatly needed.

In the 18 months many people were involved in planning the building and its financing and in bringing those plans to a successful conclusion, surmounting obstacles posed by the weather and labor disputes.

The efficient planning is reflected in the new building which provides seating for 1,800 people, a comfortable mezzanine lounge on the second floor, with washrooms and canteen facilities and an equally large room on the ground floor which will be finished to provide facilities for meetings and social events. Storage space for the agricultural society has been provided under the seating on the east side and four dressing rooms with showers under the west side seating.

But the greatest planning efficiency is evident in the fact that levels of both rinks are the same,

permitting easy transfer of icemaking equipment from one ice surface to the other at the north end. Similar passageways at the south end link the two arenas. This permits both ice surfaces to be used for an event with access to both arenas from one entrance. Or each arena may be used by a different organization with separate entrances and the connecting passageways closed.

The public will be able to see all of these features and the many others at the official opening of the arena Friday evening. At that time, too, they can pay tribute to the town's arena board, which conceived the original plan: Elgin Barrow, Brydon Ellis, Jack Hollowell, Allan Bales, Bill McVean, Eric Charity, Deputy-reeve Floyd Perkins and

Councillor William Lazenby. Also to be honored and thanked is the arena building committee, which has been constantly active in planning, in supervising construction and in watching expenditures, to see that the town received value for every dollar spent. Members of this hardworking committee are: Chairman George Chassie, Jack Hollowell, Douglas Moore, David Harvey, Thomas Graham. Stewart Gill, Graeme Bales and council representatives John MacDiarmid and William Lazenby, secretary.

Let Experience Speak

During the course of the nine month long Ontario Municipal Board's "off again, on again" hearing last year into Metro's application to establish two dump sites in Vaughan Township, the North and South Thackeray sites, much evidence was brought to light which discredited the much-vaunted MacLaren Report which was the basis of Metro's application for the sites.

Metro paid \$175,000 for the report, said to be the most exhaustive study of waste disposal ever done in North America, and it was designed to cope with Metro's garbage disposal problems for the next 20 years. The ultimate solution as set out in the report, is the establishment of a series of mammoth dump sites, all located conveniently (for Metro politicians) outside Metro boundaries.

The two Thackeray sites in Vaughan total better than 600 acres of land and Metro has now indicated that it will seek a 745-acre site near Maple. Last week, initial moves were made in the acquisition of three sites in Pickering Township.

It was evident at the conclusion of the OMB hearing on the Thackeray sites however, that Chairman J. A. Kennedy had some reservations about the recommendations of the MacLaren Report. His decision was that the South Thackeray site should be made available to Metro (to which Vaughan had agreed initially) but that decision on the larger north site be deferred and considered in conjunction with a possible application for the Maple site.

Even more serious reservations about the MacLaren Report were outlined by Toronto's Commissioner of Streets Harold Atyeo, chairman of the city's committee of public works, in a report made to Toronto City Council last October.

Mr. Atyeo flatly contradicts the MacLaren Report conclusion that landfill and incineration are the only practical methods of waste disposal. He points out that the so-called "sanitary landfill" method of waste

disposal, that is, garbage dumps, bring the associated three evils of water, ground and air pollution and insists that "to date no satisfactory means of control has been found to eliminate any of these conditions".

Even more damning is his statement that the report recommends the use for landfill sites of fine agricultural lands and that when filled "these lands cannot FOR CENTUR-IES be used for agriculture or devel-

opment." The only feature which justifies the landfill method of disposal is the immediate cost factor, Mr. Atyeo has concluded and even in full knowledge of the costs involved, he remains firmly convinced that incineration should be given preference over landfill schemes.

Mr. Atyeo further reveals that when Metro Works Commissioner Ross Clark called a meeting of borough works commissioners last June, it was the unanimous opinion of this group that more emphasis should be placed on incineration than was recommended in the MacLaren Report, although of course Mr. Clark did not reveal this at the then current OMB hearing.

Mr. Atyeo and the other borough engineers who were so critical of the MacLaren Report recommendations are all men of long experience in waste disposal and its financial aspects.

If and when Metro renews its application for the North Thackeray site and/or makes application for the Maple site, we would like to see these gentlemen called on for their more than informed opinions.

Perhaps if Metro Works Committee would ask the advice of this informed group, citizens of both Metro and Vaughan could even be spared the expense of another lengthy OMB hearing entirely.

It's School Holiday Time

There's a new school holiday this year . . . the week of March 18 to 22 . . . replacing the traditional Easter week holiday. Drivers are advised to be on the alert for carefree children like the little girl above. She's so intent on retrieving her ball that she's forgotten the danger of running out from between parked cars.

And the Ontario Department of Transport has this reminder for parents too: make sure your children know and follow the traffic safety rules . . . look both ways before you cross the street . . . keep out from between parked cars . . . ride your bike safely, obey signs and signals . . . play games in a safe place away from traffic . . . walk, don't run, when you leave the curb . . . walk facing traffic where there are no sidewalks.

Dear Mr. Editor:

It was 1957 when Jean and Bill Babcock looked about Richmond Hill and discovered no place for young children to enjoy happy summer activities. I see somebody else I know who They had a young son so they decided to start a day camp. In due course, the Richmond Hill day camp of it. became Richildaca, a name coined by Jean and Bill.

At first, the camp was assisted by the Richmond Hill Rotary Club with a grant of \$400 to pur-

chase supplies and equipment. "In that first year," said Bill, "I was assisted call-up for the army they've had stone in the cultural life of the by Alan Bathurst, then a teacher at Richmond Hill High School. The camp operated under the recreation committee and was subsidized by them until 1959." From then on, Jean and Bill carried on alone. They formed a limited company "Richildaca Camps Limited" and moved to a 25-acre site at Kettleby

in King Township. Camp with the Babcocks is a family venture and John William became a drover they all work together to satisfy a common desire to bring the joys of camp life within the reach of

> As they look back over their 10 years at Richildaca they have no regret because their philosophy

"Most camps hire specialists to take charge of years and the months and the York City, Cleveland, Winnipeg activities. We think our camp is unique in the fact hours and the minutes and the and Toronto, it was with a certhat our 32-member staff is home-grown. Most of the staff have grown into the knowledge of camp activities since their early high school days. A good example is Kel Tonner who will direct activities at Richildaca this summer," said Bill.

KEL TONNER, STAFF, and CAMPERS
