CRIPPLED CHILDREN

...need your help

In Richmond Hill there are many children who need your help. Crippling conditions can occur in many ways. Babies are born with cleft palates, deformed or missing limbs, absence of nerve and muscle control or one of scores of impediments to natural physical development. Disease causes many physical disabilities that can have a lifelong effect. Children, too, are prone to accidents which in these days of great speed appear to increase rather than diminish. With proper care and treatment, especially in the early stages, there is a great chance of full recovery. Support the Easter Seals campaign and make available to each crippled child the diagnostic treatment and rehabilitation service best suited to his needs.
