**When Do You Have An Empty Stomach?**  
Sometimes a physician may direct you to take a medicine on an empty stomach. For example, some penicillin is about twice as effective when taken on an empty stomach. Three hours after a meal all the food in the stomach has moved to the next digestive process. It is empty.  
If you do not exactly know how to use any medicine and your physician or dentist is not available to answer questions, ask us. The odds are we can immediately give you the correct answer. Never take chances. We are glad to help.  
YOUR DOCTOR CAN PHONE US when you need a medicine. Pick up your prescription if shopping nearby, or we will deliver promptly without extra charge. A great many people entrust us with their prescriptions. May we compound and dispense yours?
