

# Get Away From My Door Cries Vaughan Township Council

Vaughan Township Council doesn't like the way neighboring municipalities sliced its boundary lines to pieces at a recent county regional government meeting in Newmarket.

Reeve Garnet Williams said at last week's council meeting that he was "ashamed of the effort we put up as a council at this county meeting. We said almost nothing about what we wanted while the other municipalities carved us up left, right and centre."

The matter rose when Councillor John Gilbert castigated council for failing to produce a map clearly outlining the boundary lines "we want for our own township."

"I think we will be very lax if we don't have another meeting and draw up a map outlining our suggested boundaries as well as stating what our requirements as a township are."

"We stood by while Markham Township cut us up, while Richmond Hill cut us up, and even Woodbridge got a piece of us. I feel that we should definitely state what we feel our lines should be."

He also charged that council hadn't "looked too good at the meeting. I think it is very important to let everyone know where we stand and a map is important because words are soon forgotten."

The councillors spent most of their time turning their guns on themselves noting that they had recommended that "no maps be submitted to the meeting" which was held in Newmarket March 26 "showing the proposed restructuring of local municipalities with the County of York."

Reeve Williams observed that it was "a shame Vaughan didn't participate in drawing a map and clearly showing what we wanted for ourselves. We're the industrial hub of this area and we should have something to say."

"I think it's about time we got our heads out of the sand," said Councillor John Gilbert.

The regional government debate took a new turn when Deputy-reeve Albert Rutherford commented that "there isn't one of the Southern Six municipalities that think alike."

This brought Councillor Dalton McArthur into the fray denying the Southern Six municipalities were in disagreement.

"For the first time in five years we have three major municipalities agreeing that the form of government should be the Southern Six."

He explained the three municipalities were Richmond Hill, Vaughan and Markham Townships.

"Richmond Hill Reeve Donald Plaxton stated that it was the majority of his council's feelings that the Southern Six should be the logical form of a regional government," he said.

Councillor Gilbert stated that "we should sponsor a meeting

of the three municipalities we're talking about."

Councillor David Fraser thought this was a good idea noting that there "was some obvious unanimity between the three municipalities" despite individual differences between councillors.

"I think we should unite and if we do the rest of them will own members and discuss pre-paration of a map indicating where it wants its boundary lines as well as discussing the next move in general."

Council tentatively decided to consider calling a meeting of its members and discuss pre-paration of a map indicating where it wants its boundary lines as well as discussing the next move in general.

The March 26 meeting in Newmarket was the first one called specifically for the purpose of discussing regional government although Municipal Affairs Minister Darcy McKeough predicted a year ago that York County would be declared a region effective January 1, 1971. All 14 municipalities attended the meeting.

The councils of Vaughan and Richmond Hill at that time came out in favor of amalgamation of the southern six municipalities — including the Town of Markham, Markham Township, Woodbridge and Stouffville — as a separate region. They recommended that York County be divided into two regions, with the southern region extending from Steeles Avenue to the water shed north of Oak Ridges.

Markham Township Deputy-reeve Anthony Roman explained his council favored amalgamation of the Southern Six (Richmond Hill, the Townships of Markham and Vaughan, the Villages of Stouffville and Woodbridge).

All council representatives stress there were divided opinions among the various council members and final decisions were reached by agreement of the majority.

# The New SAFETY '99'

## A good tire made even better

## for the 1970's

Nothing stands still these days. That's why we're retiring 'Old Faithful' in favor of a new and better Safety '99'. Wider. Flatter. Stronger.

Heavier than its million or more predecessors. Changes not just for the sake of change — but to meet the heavy demands of today's driving. We like to be a jump ahead. We have to figure what happens to tires at speeds you may not even need. You see, tire failures increase alarmingly as speeds increase. A tire tread driven at the old speed-limit of 60 m.p.h. will run almost twice as far as one now driven at 70. And a tire capable of giving 25,000 service miles at 50 m.p.h. will survive only 6,000 at 80 m.p.h. A sobering thought — back of our determination to make tires safer, longer-lived.

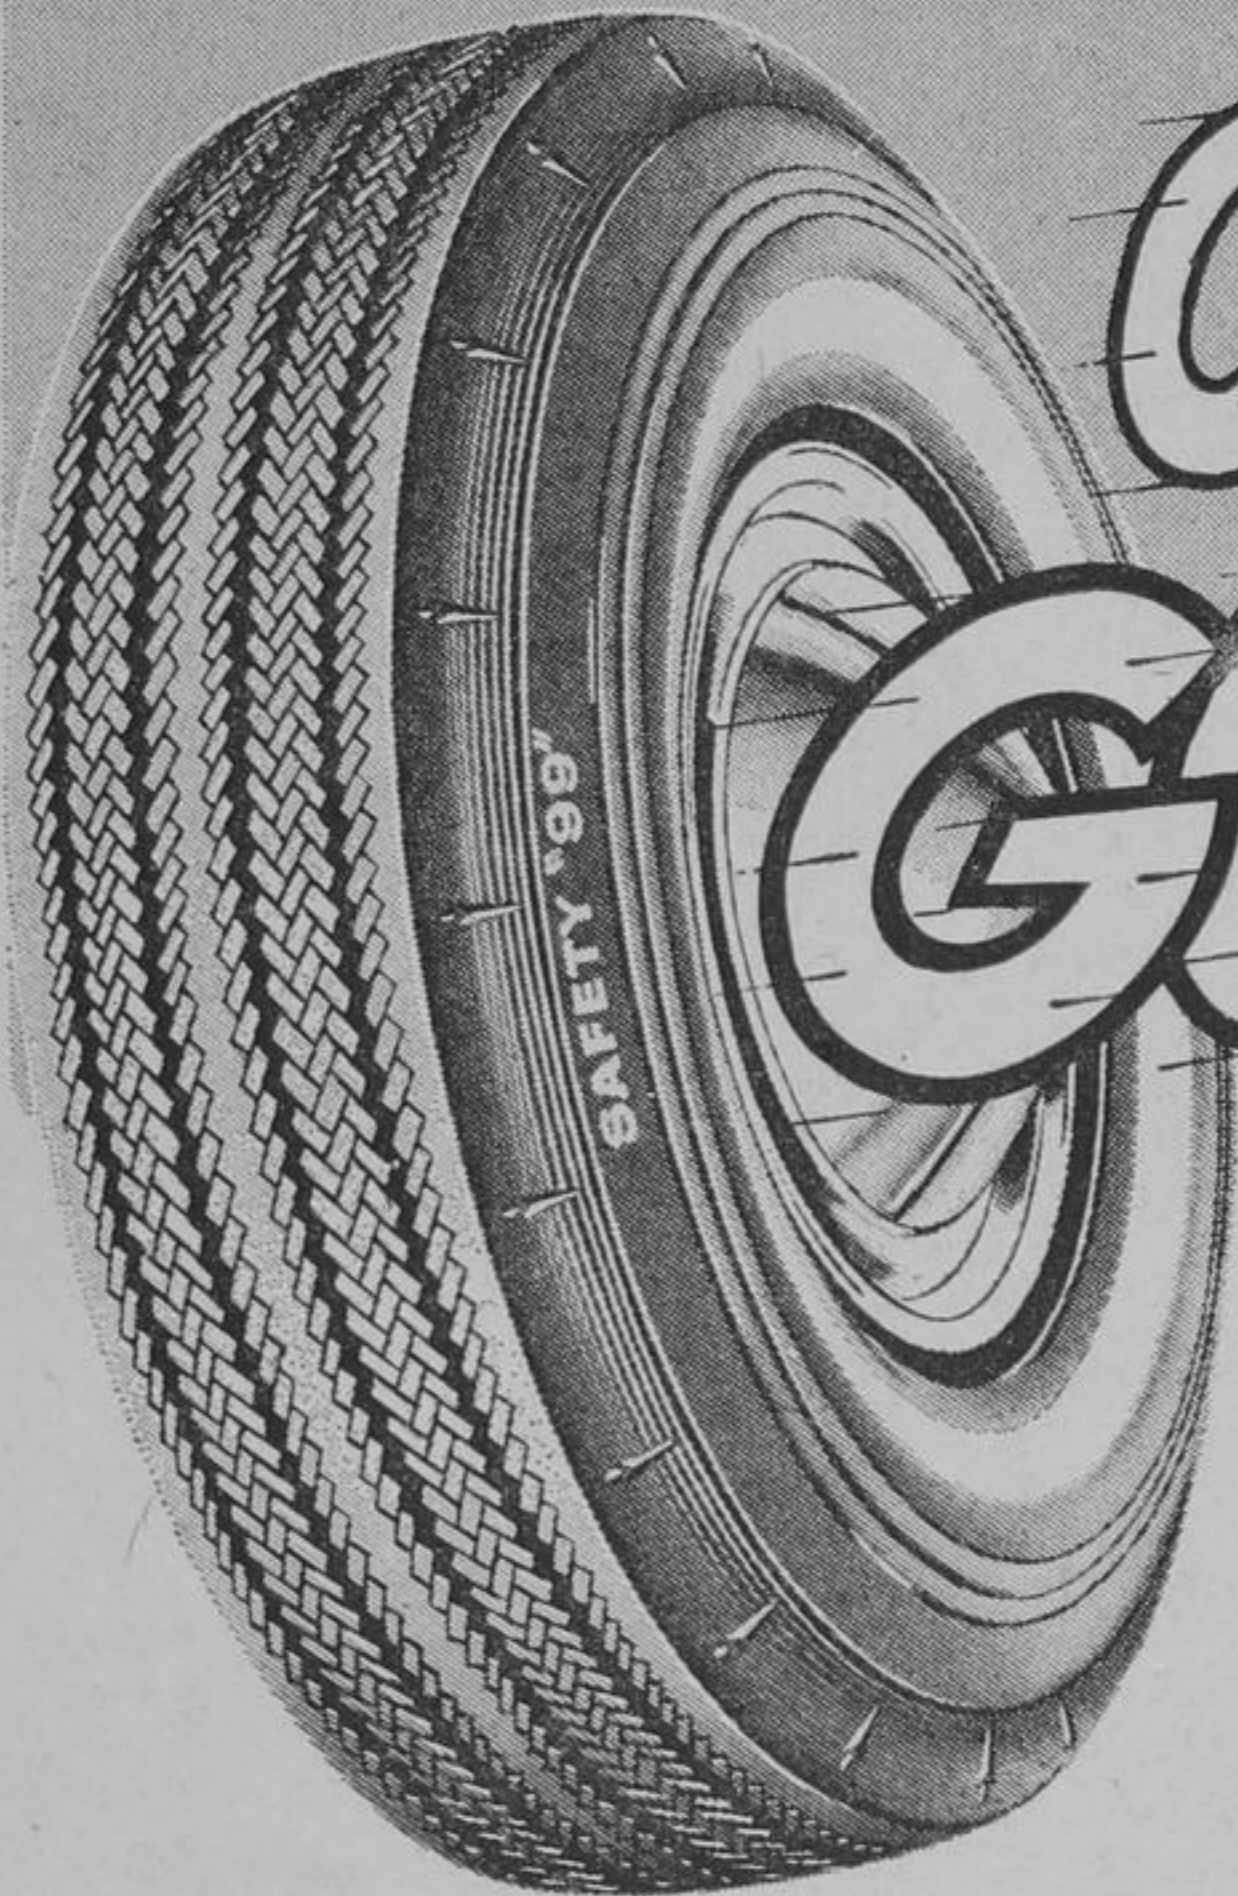

SAFETY '99' — in nylon or polyester — is a leader and we aim to keep it that way. Ride it — and you'll know it. Trade in your old tires — and you'll discover it's still North America's best tire buy.
