Mr. Transmission Finally Loses

(Squirts) Dairy Queen 6, Mr. Transmission 4 Up to last week the Transmission team was the only squad in any of the Richmond Hill house leagues to have not lost a game.

Their star Pitcher Glen Doyle was away, and Dairy Queen took full advantage of the situation to win their third game of the season.

Hodgins Hardware 21, Rice's Flowers 3 Hodgins swept both games that they played against Rice's this year. Hodgins' runs for and against in this two game series against Rice's were

Hall's Fuels 15, Consumers' Gas 7 Hall's had a great week, as they beat two of the top teams in the league to move into fourth place, only two points behind Police Association.

Village Coiffure and Village Pizza did not play (PEEWEE) Bennett's Textiles 7, Dynes Jewellers 2 Dynes had a full team this week and they just about pulled off an upset. They jumped into an early 2-0 lead, on runs by John Behrns and Dave Bromley.

After 21/2 innings they still had a slim 2-1 lead, but in the bottom of the third Craig Foss went wild and allowed Bennett's to score six runs.

Ando Cast Sanitation 16, Eric's Cycle & Sport 10 Ando Cast's big inning was the second, as they scored 13 runs in that inning alone. Eric's best output was five runs in the third.

Mike Widdifield pitched his first victory in two starts, and aided his own cause by belting two homers. Kier Todd, one of the leading hitters in the league, knocked out his first homerun of the year. Kinnear Pontiac 6, Richmond Hill Music 4

Kinnear had only seven players, but they still managed to win this one. Kinnear allowed only 11 Music players to get on base in five innings, which is pretty good considering they only had one fielder. For Kinnear it was a real team effort, as six of their seven players got one run apiece. For Music, Rick Stoness led the way by scoring two runs.

Charlton Hardware 10, Mac's Heating 6 In this error packed game, Mac's came out on the bottom for the second time in a row against Charlton.

The third ining seemed to be the clinching one,

pitching could not save Mac's.

Again, Wayne and Rob were the pitchers in her credit, while allowing four Port Colborne to play the Syraseason record now stands at 4-1.

Wes Berseth had a fantastic day at the plate, as he contributed a homerun and triple to Richmond Hill's winning cause.

The first Border City pitcher had a great changeup, which worked almost all the time. Richmond Hill 8, Border City 3

Richmond Hill are now playing above .500 ball, as this win moves their record up to 8-7. Rob Clephen hurled a fantastic game, as he

were hit very far into the field. Stacey Richard made a nice move, as he stretched a bunt into a triple. Larry Mansbridge

struck out 13 batters. Only a few of Rob's pitches

smashed a homerun into centre field. ALL-STAR ACTION Squirt All-Stars 3, Kinnear Pontiac 7

You take the first place team in the peewee house league, add a few top players from Eric's,

a pretty good team. Almost everybody that played for Kinnear that night, was in the top 25 batters or so. But that did not stop Glen Moreland from pitching a three hitter. Rick Carton also pitched a three hitter for Kinnear, but he allowed more walks, which eventually turned

Because Glen was pitching from Squirt distance he was hard to hit, as Bill Andrews, Ted Gallony, and Glen Jarvis were the only ones to hit safely.

### Who Makes The Safest Cars In The World?

The safety-criticised North American auto industry

safety features on the various models of cars made on this continent. These features are almost entirely voluntary on the part of the industry and follow the instruction of more than 80 different safety items on 1967 and '68 models,

that this year is adding more than 75 different new

mostly in response to government regulations. No one model of this year's cars has more than 20 of these 75 safety features. But the majority will likely be adopted by all makers if experience justifies their

additional cost and other drawbacks. Principal items are the guard rail doors brought out by General Motors to prevent side penetration; the crushable "S" frame of Ford to absorb collision impact; and the new quartz lamp of Chrysler Corporation designed to illuminate the area now missed by conventional lamps. Some of the safety features have been under

development for more than 10 years. Despite millions spent on safety research and the addition of safety features on new manufacture that now affect 25 percent of the cars on the road, deaths and

injuries continue to climb. This bears out the industry's claim that people not cars - cause accidents and that the human part of the problem deserves at least equal attention. That's something only YOU can help.

See you next week.
