## Chris Castel, Young Scientist Of The Year

Philips' Young Scientist of the Year, Chris Castel of RR 1, Schomberg, a student at King City Secondary School, won his title at the 10th annual Canada-Wide Science Fair in Edmonton. His exhibit, a study of an organic dye laser won for him a cheque for \$1,000 and an all-expense-paid fun and science trip to Eindhoven, the Netherlands, provided by the Philips Electronics Industries Limited, Toronto.

The awards were established last year to encourage the development of young Canadian scientists in areas which will ultimately benefit mankind. The Philips main plant is located in Eindhoven.

Chris' schoolmate Mike Finnigan was also a winner of a major prize at the science fair held at the University of Alberta in Edmonton early in May. In the above picture Chris receives his \$1,000 cheque from John Schurman of Philips Electronics Industries Ltd., while
