## Recommend Council - Administrator Government For Town Of Markham

A vacuum appears to exist between council and its department heads and therefore the former should adopt a council-administrator form of local government, a management-consultant report has recommended to Markham Town Council. The town has recommended to Markham Town Council. The town includes Thornhill east of Yonge Street and Willowdale, north of Steeles Avenue.

The report, which was prepared in April by the Toronto Management firm of Stevenson and Kellog, was presented to the August 22 meeting of council. As well as looking at the administrative set up in the municipality, the firm presented a separate report on the salary structure.

The report said the "overall administration of the Town of Markham can be improved", but that council should avoid getting involved in the details of operating and administration.

Adopting the council-administrative form of government would allow administrative matters to be co-ordinated by one person.

"He would be responsible to council for business affairs of the town and the activities of all em-

ployees", the report said. Council would have to trust the administrator so that he would be free to use his "management expertise".

This would let councillors take the initiative in making policy and developing projects.

The administrator would be expected to brief the mayor on all important civic matters, as well as to point out to him the effects of federal and provincial legislation on the municipality.

"The efficient and affective co-ordinating of the day-to-day administration of the town is the administrator's prime responsibility," the report

The new form of government would also mean fewer council meetings, the report stated. It recommended one committee of the whole, with rotating chairmen, where standing committees are required. Also a smaller task force of committees of council should be set up to handle specific projects or activities, according to the re-

The consultant's report was referred to committee-of-the-whole-council for study.

## Ontario is now putting together the biggest municipal enumeration in its history.

# Without you it won't be right.

This is an election year for municipal councils, school boards and other local bodies in most of Ontario. An early step in these elections is the documenting of voters' lists. To assemble voters' lists we need to make an enumeration. This is done by the Province for each municipality. But our municipal enu-

meration involves more than just voters' lists. It helps determine the division of education property taxes between the public and separate school systems. It lets the Province more fairly distribute grants to local governments to help reduce municipal tax bills. And it also helps provide us with an accurate population count.

Collecting nearly 8 million names and addresses, as you can imagine, is a big job. The

Province is employing 8,000 people to visit every residence in Ontario. When the government representative knocks on your door, the procedure is simple. The enumeration notice is pre-printed by computer with the names of everyone currently on record in your household. If you agree that the information is correct and complete, you simply sign

the notice. If there are changes, such as an addition to the family, corrections are made on the spot, verified and signed by you or any other adult in your household. If you are not home the notice is left, together with simple instructions. You mail it, postage free, only if there are changes.

You will be counted sometime between September 5th and 18th.

The Municipal Enumeration: September 5-18. Without you it won't be right.
